ITEM	DETAILS OF SITE	PROJECT PARTICULARS
1	**Site location**	Busia Town, Busia County
2	**Land Size**	Approximately 1Acre
3	**Scope**	820 No. Of Units in 2No of blocks distributed as follows 2No. Blocks Of Type G+9 Blocks 410 No. Of Units in each 150 No. Of Quad beds units 158 No. of Studios units 98 No. of single units 3 No. Stalls 1 No. Office
4	**Amenities**	Student lounge and kitchenette within block design, Student Centre, and a basketball pitch
5	**External works**	Civil works, Boundary wall, Guard House, Garbage Receptacles, Swimming pool with associated changing rooms
6	**Built area**	27,912 sm

PRELIMINARIES

ITEM	DESCRIPTION	AMOUNT
	BILL NO. 1	
	PARTICULAR PRELIMINARIES	
A	**PARTIES**	
	The **Employer** is: Principal Secretary, Ministry of Lands, Public works,Housing and Urban Development, State Department of Housing and Urban Development P.O Box 30119 -00100 NAIROBI, KENYA The **Engineer** is: The term "PM" wherever used in these Bills of Quantities shall be deemed to imply the Engineer as defined in Condition 1 of the Conditions of Contract or such person or persons as may be duly authorised to represent him on behalf of the Government . **The Architect is:** Ministry of Lands, Public works,Housing and Urban Development, State Department of Housing and Urban Development P.O Box 30119 -00100 NAIROBI, KENYA **The Quantity Surveyors is:** Ministry of Lands, Public works,Housing and Urban Development, State Department of Housing and Urban Development P.O Box 30119 -00100 NAIROBI, KENYA **The Structural/ Civil Engineers is:** Ministry of Lands, Public works,Housing and Urban Development, State Department of Housing and Urban Development P.O Box 30119 -00100 NAIROBI, KENYA **The Electrical / Mechanical Engineers is:** Ministry of Lands, Public works,Housing and Urban Development, State Department of Housing and Urban Development P.O Box 30119 -00100 NAIROBI, KENYA	

ITEM	DESCRIPTION	AMOUNT
A	**LOCATION OF SITE** The site of the proposed works is located Alupe, Nyanza County The Contractor shall be deemed to have visited the site and satisfied himself as to:- **a)** The nature, position, topography and access of the site **b)** The amount of the rubbish or debris to be cleared away before commencement. **c)** The nature, current usage, proximity and size of adjoining property and buildings **d)** The availability of land for the erection and positioning of all temporary structures, plant and materials necessary for the execution of the works. The Contractor shall obtain approval from the relevant Local Authority in adherence to site access and erection of temporary structures and must ensure all matters relating to the requirements of these authorities. No claim will be allowed for travelling or other expenses which may be incurred by the Contractor in visiting the site or preparing the tender for the works.	
B	**EXISTING SITE CONDITIONS** The site for the proposed works is .....Alupe , Nyanza County The Contractor is advised that the site is in a predominantly residential area and all measures should be taken to avoid nuisance to neighbours. All occupation health and safety requirements must be met as required by law. This includes prevention and or minimizing noise, dust, fumes e.t.c. Notices should be given prior to disruption of services	
C	**SCOPE OF CONTRACT** **The Works under this contract comprises of the following;** **(a) 2 No Type A Hostel Block with a plinth area of 26,520SM** **(b) Waste receptacle Plinth area 112 SM** **(c) 2 No Guard House Plinth area 30 SM** **(d) Basket Ball Pitch 574 Sm** **(e) Boundary wall - 2.4m high with a length of 500LM** **(f) Road works -3540 SM** **(g) Student's Centre Plinth Area 792 SM** **(h) Associated electrical and Mechanical works** **(i) External and Civil works** Carried to collection	

ITEM	DESCRIPTION	AMOUNT
A	**DESCRIPTION OF THE WORKS**	
	The construction comprises reinforced concrete foundations, masonry walling, reinforced concrete beams, column , staircases and suspended solid slabs, roof construction.	
	The exterior facade consists of steel casement windows, steel and timber doors , render and paint finish, clay and stone facing finish to walls	
	The interior works includes timber doors and finishes which are generally plaster and paint to walls, ceramic and non slip ceramic tiles to floors and walls.	
	External works generally comprise of foul water drainage, storm water drainage, pathway, dryline area, septic tank, underground water tank.	
	All mechanical / electrical services and other specialist works associated with the above works shall be executed by domestic/nominated sub contractors approved by the Engineer	
	CONTRACT PARTICULARS	
B	**FORM OF CONTRACT**	
	The Contractor will be required to enter into a contract with the Employer under the **Terms and Conditions of Contract as "Standard Tender Document for Procurement of Works (Building and Associated Civil Engineering Works) Issued by the Public Procument Regulatory Authority in February 2021 (updated 2022)** and in association with the latest applicable version of the Public Procurement and Asset Disposal Act.	
	The Contractor's attention is called to the appendix of the conditions of Contract and additions and amendments thereto, which shall be read as incorporated herein and he shall allow any sums which he considers necessary for the observance of such conditions, together with sub clauses used in application.	
	The prioirity of such documents shall be as stated in the conditions of agreement.	
	Carried to collection	

ITEM	DESCRIPTION	AMOUNT
A	**LIABILITY AGAINST INJURY TO PERSONS AND PROPERTY** Insurance against injury to persons and property NOTES In addition to the conditions of the contract and the requirement contained herein the contractor's all risk policy shall cover the full value of the following and allow for all costs thereof:- i) The works and temporary works erected in performance of this contract. ii) The materials on site, plant and tools iii) The cost and expense of removing debris of the property insured, destroyed or damaged by any peril insured. iv) Professional fees (to be allowed at 15% of the contract sum) v) Employer's liability (workman's compensation) ii) Third party (Public liability for an indemnity of not less than shs 5,000,000.00 for any accident or series of accidents arising from the same event (unlimited in aggregate) The contractor shall ensure that all sub-contractors effect and maintain such insurances as are necessary to cover their liabilities in respect of injury to persons and property and workman,s compensation. Should the contractor already hold annual insurances covering the whole of his activities, and the indemnity required under the existing policy/ies then further insurances shall be effected and maintained to cover such excess, the policies of insurances being suitably endorsed to cover this project	
B	**Insurance of the works (contractors liability)** The Contractor shall insure as required in the Conditions of Contract. No payment on account of the work executed will be made to the Contractor until he has satisfied the Engineer either by production of an Insurance Policy or and Insurance Certificate that the provision of the foregoing Insurance Clauses have been complied with in all respects. Thereafter the Engineer shall from time to time ascertain that premiums are duly paid up by the Contractor who shall if called upon to do so, produce the receipted premium renewals for the Engineer's inspection.	
	Carried to collection	

ITEM	DESCRIPTION	AMOUNT
	PERFORMANCE BOND	
A	**Performance bond for the works**	
	The Contractor shall find and submit on the Form of Tender an approved bank or approved (By PPRA) Insurance Company and who will be willing to be bound to the Employer in an amount equal to ten **percent (10%)** of the Contract amount for the due performances of the Contract up to the date of completion as certified by the Engineer and who will when and if called upon, sign a Bond to that effect on the relevant standard form as seen in the CONTRACT STANDARD FORMS (without the addition of any limitations) And should the surety fail to be approved, the Contractor shall furnish within seven days another Surety to the approval of the Employer. Note that no payments on account of works executed will be made to the Contractor until he has submitted the Performance bond, duly stamped signed and sealed by an approved bank or insurance company.	
B	**POSSESSION AND COMMENCEMENT**	
	The Contractor shall take possession of the site on the date indicated in the acceptance letter. The date of commencement of the works shall also be communicated to the Contractor and the contract period shall run from the commencement date. The Contractor is expected to utilize the period between possession and commencement to mobilise his resources to ensure smooth running of the works from the commencement date.	
	Carried to collection	

ITEM	DESCRIPTION	AMOUNT
	PROJECT SUPERVISION	
A	The said works shall be executed under the direction and to the entire satisfaction of the Engineer and Clerk of works who shall have the Engineer's specifically delegated authority and shall at all times have access to the works, to the yards and workshops of the contractor or other places where goods are being prepared for the building.	
	LABOUR CAMPS	
B	The contractor will generally be permitted to house labour on site subject to approval by Architect	
	DOWNTAKINGS	
C	All materials arising from demolitions and downtakings are deemed to be the property of the employer. No claim will be entertained on account of employer excising this right to retain the materials All downtakings shall be carefully removed, taken down, dismantled and stored on site until instructed by the Engineer to remove from the site. Such materials shall only be incorporated in the new works if required by the Engineer in which case appropriate adjustments will be made in the final account for the cost of labour, screws etc for fixing such downtakings in the new works.	
	DAMAGES	
D	Damages for delay in completion shall be levied at the rate of Kshs ……Refer to the special Conditions of Contract)…… …… ……

ITEM	DESCRIPTION	AMOUNT
	BILL NO. 2	
	GENERAL PRELIMINARIES	
	PRICING OF ITEMS OF PRELIMINARIES AND PREAMBLES	
A	Whenever in the Contractor's priced Bills of Quantities no price appears against an item of Preliminaries or Preambles or work items , the value of such item shall be deemed to be included in his prices for other items in the Bills of Quantities.	
	SUFFICIENCY OF TENDER	
B	The Contractor shall be deemed to have satisfied himself before tendering as to the correctness and sufficiency of his tender for the works and of the rates and prices stated in the priced Bills of Quantities. Rates and prices quoted shall cover all his obligations under the contract and all the matters and maintenance of the works	
	RECORDS	
C	The Contractor shall ensure proper records are kept and maintained for : Daily Reports on Personnel and Machinery; tracked programme; weather charts/reports; site instruction book and query book,a digital camera shall be provided for taking progress photos The contractor shall be required to provide equipment for taking ground and aerial photos or videos in relation to the progress of works when called upon to do so.	
	DEFINITIONS AND ABBREVIATIONS	
D	Throughout these Bills, units of measurements and terms are abbreviated and shall be interpreted as follows: mm shall mean millimeter lm shall mean linear meter sm shall mean square meter m^2 shall mean square meter cm shall mean cubic meter kg shall mean kilogramme N shall mean Newton KN shall mean KiloNewton	
	Carried to collection	

ITEM	DESCRIPTION	AMOUNT
	in/" shall mean inches L f shall mean linear foot s f shall mean square foot c f shall mean cubic foot L b shall mean pound avoirdupois No. shall mean number B.S.M shall mean both sides measured K.S. shall mean current Kenya Standard specification published by the Kenya Bureau of Standard, P.O. Box 54974. NAIROBI, Kenya. 'As described' shall mean as described in these Bills of Quantities. 'As before described' shall mean the whole of the previous description except as qualified in the current one.	
	Carried to collection	

ITEM	DESCRIPTION	AMOUNT
	SITE LEVELS	
A	Before commencing work the Contractor must arrange for and agree with the Architect, Engineer and Quantity Surveyor the existing site levels and similarly establish and agree on a bench mark. The Contractor shall provide a surveyor to ensure all levels are achieved as per the drawings and Architects/Structural Engineer's instructions	
	SETTING OUT	
B	The contractor shall set out works in accordance with the dimensions and levels shown on the drawings and shall be responsible for the correctness of all dimensions and levels set out by him and he will be required to amend all errors arising from inaccurate setting out at his own cost and expenses. In the event of any error or discrepancy in the dimensions or levels marked on the drawings being discovered, such errors or discrepancies must be reported by the Contractor to the Engineer for his immediate attention. No work shall be commenced by the Contractor until he has received written instructions from the Engineer to adjust such discrepancies which may be proved, upon receipt of such instructions and no claim for extra expenses or relief from the provisions of Clause 5 of the Conditions of the Contract , any discrepancy or error in the dimensions or levels shown on the drawings may be made thereafter. The Contractor shall give the Engineer reasonable notice of the intention to set out or take levels for any part of the Works so that arrangements may be made for checking the work. The accuracy of setting out and leveling shall be within the tolerances specified in the Specifications or on the Drawings. The checking of setting out or leveling by the Engineer shall not relieve the Contractor of his duties or responsibilities under the Contract.	
	MEASUREMENTS	
C	Measurements are based on **Standard Methods of Measurement of Building Works and Associated Civil Works For Eastern Africa (SMM) Second Edition 2008.** In the event of any discrepancies arising between the Bills of Quantities and the actual works, the site measurements shall generally take precedence.	
D	**GENERAL SPECIFICATIONS** All works to be carried out in accordance with the Ministry of Roads, public Works and Housing **General Specifications for Building Works issued in 1976** or as qualified and amended.	
	Carried to collection	

ITEM	DESCRIPTION	AMOUNT
	SAMPLES	
A	The contractor shall furnish at the earliest possible opportunity before work commences and at his own cost any samples of materials or workmanship that may be called for by the Engineer for his approval or rejection until such samples are approved to be the acceptable standard for the work to which they apply. The samples shall be maintained and displayed on a designated section within the site for the duration of the project where practical and possible.	
	PROTECTION OF EXISTING PROPERTY	
B	The contractor shall take every precaution to avoid damage to all existing property including boundary wall, carpark, roads, cables, drains,staircases, lift etc including other services and he will be held responsible for all damages hereto arising from the execution of his contract and he shall make good all such damages when directed at his own expense. Any damage or disturbances caused to any element shall be reported immediately to the Engineer and the relevant Authority and shall be made good to their satisfaction at the Contractor's expense.	
C	**PROTECTION / RELOCATION OF EXISTING SERVICES** Prior to commencement of any work the Contractor is to ascertain from the relevant Authorities the exact position, depth and level of all existing electric cables, water pipes and all other services in the area and he shall make whatever provisions may be required by the authorities concerned for the support and protection and/or relocation of such services as will be necessitated. The contractor is also expected to generate a utility management plan to the approval of the Engineer . Any damage or disturbances caused to any service shall be reported immediately to the Engineer and the relevant Authority and shall be made good to their satisfaction at the Contractor's expense.	
	Carried to collection	

ITEM	DESCRIPTION	AMOUNT
A	**MATERIALS, TOOLS, PLANT AND SCAFFOLDINGS** All materials and workmanship used in the execution of the works shall be of the best quality and description. Any materials for the works condemned by the Engineer shall immediately be removed from the site at the Contractor's expense. The Contractor shall be responsible for the provision of all materials, scaffolding, tools, plant, transport and workmen required for the works except in so far as may be stated otherwise herein and he shall allow for the provision of the foregoing except for such items specifically and only required for the use of Nominated Sub-contractors as described herein. No timber used for scaffolding, formwork or similar purpose shall be used afterwards in the permanent works. All such plant, tools and scaffolding shall comply with all regulations whether general or local in force including Environmental,Social, Health and Safety (ESHS) policies throughout the period of the contract and shall be required as may be necessary to comply with any amendments in or additions to such regulations The Contractor shall keep on the site and maintain in good condition one dumpy or quickset level, metric leveling staff and one 30 metre steel tape for the use of the Architect, Surveyor and Engineer. The contractor may be required to provide an appropriate tower crane as required during the project life. Where a crane is provided, it should meet all regulatory and technical standards, all licences in connection with erection, usage shall be at the Contractors expense. The contractor may be required to provide an appropriate tower crane as required during the project life. Where a crane is provided, it should meet all regulatory and technical standards, all licences in connection with erection, usage shall be at the contractors expense. **Carried to collection**	

ITEM	DESCRIPTION	AMOUNT
A	**LOCAL REGULATIONS AND BY-LAWS** The contractor is to comply with all local regulations and by-laws of the Local Authority including serving notices and paying of fees where applicable. These include, but not limited to: National Environmental Management Authority (NEMA), National Contruction Authority (NCA), Water Resources Management Authority (WARMA) The Contractor will be held responsible for serving on the Chief Inspector of Factories a written notice not later than seven days after the beginning of the building operations included in this contract stating the particulars required. **TRANSPORT TO AND FROM THE SITE** The Contractor shall include in his prices for the transport of materials, workmen etc to and from the site of the proposed works at such hours and by such routes as are permitted by the Authorities. All unit rates for local or imported goods are to include freight, insurance, handling and delivery costs to the project site together with import duties, sale tax, port charges etc and all other charges of whatever nature.	
B		
	Carried to collection	

ITEM	DESCRIPTION	AMOUNT
A	**FAIR WAGES** The Contractor shall pay rates of wages and observe hours and conditions of labour not less favourable than the minimum conditions of employment applicable in the area in which the work is carried out. The relevant notice must be posted up and kept posted upon the site where it can be conveniently read by the employees concerned in languages they can understand. The Contractor is to comply with the regulations of Wages and Conditions of Employment Act, Building and Construction Industry Wages Council and is to be responsible for compliance of the sub-contractors employed in the execution of the contract. If required he is to notify the Engineer of the names and addresses of all such Sub-contractors. Any Contractor or Sub-contractors not complying will not be permitted to tender for other work for such a period as the Engineer may determine Should a claim be made to the Engineer alleging the Contractor's default in payment of fair wages to any workman employed on the contract and if proof thereof satisfactory to the Engineer, may failing payment by the Contractor, pay the claim out of any monies due or which may become due to the contractor under this contract. The Contractor is to furnish to the Engineer, if called upon to do so, such particulars of the rates of wages, hours and conditions of labour referred to above as the Engineer may direct	
B	**SECURITY OF WORKS** The Contractor shall be entirely responsible and shall pay security of all works, stores, materials, plant, personnel etc both his own and sub-contractors and shall also provide all necessary watching, lighting, and other precautions as necessary to ensure the security, the safety and protection of the public. He is to ensure that there is no informal business settlement near the establishment.	
	Carried to collection	

ITEM	DESCRIPTION	AMOUNT
A	**OCUPATIONAL HEALTH AND SAFETY MEASURES** The Engineer expects the Contractor to adhere to strict safety measures. In this regard the Contractor should ensure that all his workers, the Consultants and his sub-Contractors workmen are wearing Personal Protective Equipment (PPE) before commencement of any work where applicable including overalls with the company name clearly printed on the back each with clearly marked Identification Numbers stitched or imprinted on. The Contractor shall allow for providing all watching, lighting, barriers, signs, covering open trenches and protection of the works, including Sub-Contract works, as may be necessary for the safety of the works and for the protection of the public and his own and Sub-Contractors' employees. He shall also ensure provision of a certified and qualified safety, health and environmental officer, access to ambulance services at all worksites and arrangement to access a local hospital/dispensary with qualified medical staff. The contractor shall take cognisance and shall fullay adhrere to the regulations of the **Occupational Safety and Health Act of 2007** including all the associated revisions The Engineer shall expect full compliance to this regulation and no excuses will be entertained for non-compliance which may lead to suspension of works until the issue is addressed satisfactorily.	
B	**PUBLIC, PRIVATE ROADS AND PAVEMENTS ETC** The contractor will be required to make good at his own expense any damages he may cause to the present approach and surrounding road surfaces during the period of the works	
C	**POLICE REGULATIONS** The contractor is to allow for complying with all Government Acts, orders or regulations in connection with employment of labour and other matters related to the execution of the works. The Contractor must acquit himself duly with current acts and regulations, including police regulations regarding the movement, housing, security and control of labour, labour camps, passes for transport, etc.. Particular attention is drawn to the rules published in Legal Notice 179 dated 2nd June 1978 (Building Operations and Work of Engineering Construction)	
	Carried to collection	

ITEM	DESCRIPTION	AMOUNT
A	**AREA TO BE OCCUPIED BY CONTRACTOR** The area of the site which may be occupied by the Contractor for use as storage and for the purpose of erecting workshops etc shall be defined on the site by the Engineer	
B	**PROGRESS SCHEDULE** Immediately after signing the contract the Contractor is to prepare a Time Progress Chart showing the time and order in which he proposes to carry out the works within the total construction time stated in the contract. The chart will show in detail the construction time and order in which each section of the work is to be carried out and be sub-divided into trades and tasks. If the contractor proposes sectional completion of the project he must plan this in detail including access roads, and services and this shall be reflected on the chart Upon the letting of the Sub-Contractors work the Contractor is to incorporate times and details of each separate Sub-Contractor work which information is to be agreed by the Sub-Contractor and the chart will be so designed to accommodate this infantine. At the end of each week the Contractor is to mark on the chart in a different colour the actual time taken to complete the respective stages and sections of the work. The contractor shall obtain the Engineer's approval on the chart and then shall supply copies to the Engineer and Quantity Surveyor If at any time it should appear to the Engineer that the actual progress of the works does not conform to the approved programme progress schedule the Contractor shall produce at the request of the Engineer a revised programme showing the modifications and accelerations to the approved programme necessary to ensure completion of the works within the agreed contract period. The submission of and approval by the Engineer of such revisions and accelerations shall not entitle the Contractor to any extra payment or extension of time and shall not relieve the Contractor of any duties or obligations or responsibilities under the contract	
	Carried to collection	

ITEM	DESCRIPTION	AMOUNT
A	**OVERTIME** The Contractor shall be responsible for any extra costs for overtime working he considers will be necessary in order to complete the works within the contract period or time for completion apart from overtime working which may be authorised by the Engineer If overtime is worked out in accordance with a written instruction issued by the Engineer the contractor will be reimbursed in respect of such overtime to the unproductive time payable over and above the basic hourly rates as laid down by the Regulation of wages and Conditions of employment Act, Building and Construction Industry Wages Council and excluding any bonuses, profits and overheads.	
B	**WATER** The contractor shall provide at his own risk and cost all water for use in connection with the works including the work of sub-contractors make arrangements with the local authority for the installation of a separate meter where applicable and possible for all water used by him throughout the contract and pay all costs and fees in connection therewith. He shall also provide temporary storage tanks and tubing etc as he may consider necessary and clear away at completion. The contractor is to provide clean drinking water at the construction site for his workers at all times. All water shall be fresh, clean and pure, free from earthly vegetable or organic matter, acid or alkaline substance in solution or suspension.	
C	**TELEPHONE** The contractor shall provide in the office, from the commencement to the completion of the works, a wireless or mobile phone and shall pay all charges or airtime necessary for its use	
D	**LIGHTING AND POWER** The contractor shall provide at his own risk and cost all temporary artificial lighting and power for use on the works including all sub-contractors and specialists requirements and including all temporary connections, wiring, fittings etc and clearing away on completion. The Contractor shall pay all fees and obtain all permits in connection therewith.	
	Carried to Collection	

ITEM	DESCRIPTION	AMOUNT
A	**<u>TESTING</u>** Allow for all expenses in connection with the testing of materials as specified hereunder including the supply and preparation of materials to be tested, the cost of materials and their packing and conveyance to the nearest approved Testing Laboratory, laboratory charges, etc. The following items of tests will be measured according to the number of tests actually called for by the Engineer but unsuccessful tests will not be included in the remeasurement. Allow for executing the following tests as detailed in the Appendices to these Bills of Quantities (PROVISIONAL)) Water Test ....10.....(litres) Sand Test .....0.1.....(m3) Aggregate Test ....0.1.....(m3) Reinforcement test (1m of mild steel rod or high tensile steel bar of various sizes) .....2..... Concrete Test (each test comprising .....5 no..... cubes as described hereinafter) ..... Testing of concrete or stone blocks of various strengths in accordance with Kenya Standard Specification (one test comprising .....5..... blocks)	
B	**<u>PRICING RATES</u>** The tenderer shall include for all costs in executing the whole of the works, including transport, replacing damaged items, fixing, all to comply with the said Conditions of Contract.	
	Carried to collection	

ITEM	DESCRIPTION	AMOUNT
A	**TEMPORARY STRUCTURES** a) The Contractor shall allow for providing and clearing away on completion of the works such temporary hoarding , rubbish chutes, gates, planked walkways, guard rails etc. as may be necessary for the protection of the workers, the general public, and for the proper execution of the works. b) As such, temporary structures shall be constructed with the approval of the Engineer and to his full satisfaction and in such a manner as to cause minimum intrisiveness and disturbance to occupants of adjacent developments and users of the adjacent roads. c) All such temporary structures shall comply in all aspects with the national laws, rules, and regulations currently in force and applicable to such structures. d) All temporary structures shall be erected in a manner so that the unloading of materials causes minimum obstruction to the use of adjacent roads and other facilities e) All temporary structures shall be kept properly lighted throughout the periods of darkness and any corners or projections shall be painted white. g) Temporary structures shall not be used or permitted to be used for advertisement purposes except with the written consent of the Engineer h) All temporary structures shall be maintained at all times in good order and good condition to the satisfaction of the Engineer. i) All temporary structures shall be removed when so required by the Engineer or at the end of the period for which it is required. j) The Contractor shall indemnify and shall keep the employer idemnified against any expenses, loss, claim or suits arising out of or in connection with the temporary structures.	
	Carried to collection	

ITEM	DESCRIPTION	AMOUNT
	SITE OFFICE	
A	The contractor shall supply, maintain, service, clean and light a fully furnished, suitable office having an approximate floor area of not less than .....200.....sqm. . The office shall have a sample room suitable dimensions with clean running water and electricity connected to the approval of the Engineer. The Contractor shall provide offices, messrooms and all other buildings required by the Contractor for his own use and the use of by Clerk of Works and Nominated SubContractors as required by the items or attendance The site office shall be equipped with a table and chairs of sufficient size and number for site meetings and plan chests for drawings shall also be provided by the contractor The Contractor shall allow for the cost of providing light refreshment for the consultants at site meetings.	
	TEMPORARY DISPOSAL OF RAIN WATER	
B	The Contractor shall provide and maintain all necessary temporary gutters, downpipes, chutes, drains etc. for conveying rainwater from the buildings and storage tanks for rainwater harvesting. The Contractor shall allow for temporary drainage plumbing and piping for keeping the premises and site free from accumulation of water. He shall also allow for construction and maintaining any necessary storm water drainage structures as directed.	
	CLEARING AWAY	
C	The Contractor shall remove all temporary works, rubbish, debris and surplus materials from the site as they accumulate, on intervals as intructed by the Engineer and upon completion of the works, remove and clear away all plant, equipment, rubbish, unused materials and stains and leave in a clean and tidy state to the reasonable satisfaction of the Engineer. The whole of the works shall be delivered up clean, complete and in perfect condition in every respect to the satisfaction of the Engineer.	
	Carried to collection	

ITEM	DESCRIPTION	AMOUNT
A	**SITE ACCOMODATION & STORAGE** The Contractor shall provide sheds for storage accommodation for all goods and materials liable to suffer damage from exposure to sunlight or inclement weather. The Contractor shall provide offices, mess rooms and all the buildings required by the Contractor for his own use and the use of Nominated Sub-Contractors as required by the items of attendance only. The Contractor shall provide at his own risk and cost where directed on the site weather proof lock-up sheds and make good damaged or disturbed surfaces upon completion to proof lock-up sheds and make good damaged or disturbed surfaces upon completion to the satisfaction of the Engineer Upon completion all temporary buildings are to be removed and cleared away	
B	**SANITATION OF THE WORKS** The sanitation of the works shall be provided, maintained and removed on completion by the Contractor to the satisfaction of the Engineers and local Authorities. The sanitary facilities shall be of generally acceptable standard regardless of the material being used to ensure ease of cleaning and maintain general well being of the users. Their location shall be agreed with the Engineers and the works shall not be commenced before the sanitary accommodation has been approved by the above mentioned authorities. The Contractor will be required to pay all conservancy charges and shall ensure clean daily maintenance and disinfecting of the sanitary facilities, and not less than once per week, the whole area shall be sprayed with disinfectant and insecticides and any temporary drains shall be removed and all works and surfaces disturbed made good and then the whole area disinfected and left clean and free from pollution to the satisfaction of the Engineer and local authorities.	
C	**HOARDINGS** The Contractor shall provide, erect and maintain throughout the course of the Contract and thereafter clear away and make good disturbed areas, temporary hoarding; approximate length of 370 metres: 2400mm high above ground consisting of: 100 diametr timber posts at 1200mm centres firmly founded and secured, 75x50mm horizontal timber rails at 900mm centres, painted GCI sheets, proper timber gates with suitable locks to Engineers approval.	
	Carried to collection	

ITEM	DESCRIPTION	AMOUNT
A	**DEMOLITIONS AND DOWNTAKINGS** The Contractor is to allow for all temporary protection required during the works including ordinary and special dust screens, hoardings, barriers, warning signs etc. as directed by the Engineer and as necessary for the adequate protection of adjacent property and finishes, workmen employed upon the site and the public. Any damage or loss incurred due to the insufficiency of such protection must be made good by the Contractor. All protective devices are to be removed on completion of the work and any necessary making good consequent upon this is to be executed to the satisfaction of the Engineer All materials arising from demolitions and downtakings are deemed to be the property of the employer. No claim will be entertained on account of employer excising this right to retain the materials unless otherwise stated. The Contractor shall allow in his rates the cost of handling and disposal of debris arising out of the demolition works All downtakings shall be carefully removed, taken down, dismantled and stored on site until instructed by the Engineer to remove from the site. Such materials shall only be incorporated in the new works if required by the Engineer in which case appropriate adjustments will be made in the final account for the cost of labour, screws etc for fixing such downtakings in the new works. The Contractor shall be entirely responsible for any breakage or damage which may occur to materials required for re-use, during their removal, unless it is certified by the Engineer that such damage or breakage was inevitable as a result of the condition of the item concerned.	
B	**ACCESS TO SITE AND TEMPORARY ROADS** Means of access to the site shall be agreed with the Engineer prior to commencement of the works and the Contractor must allow for building and maintaining any temporary access roads for the transport of materials, plant and workmen as may be required for the complete execution of the works including the provision of temporary culverts, crossings, bridges or any other means of gaining access. Upon the completion the works the Contractor shall remove such temporary roads, temporary culverts bridges etc and make good and reinstate all works and services disturbed to the satisfaction of the Engineer.	
	Carried to collection	

ITEM	DESCRIPTION	AMOUNT
A	**SIGN BOARD** The Contractor shall provide and erect where directed and maintain during the whole period of the building operation and remove at completion, one approved sign board of **approximately 3000x3000mm and approximately 5800mm overall height** to the Architect's later design giving a brief description of the works, a 3D perspective image of the project, and showing the names of the employer and the consultants, with sufficient space to append the names of the sub-contractors and suppliers when known. The lettering concerning the Architect, Quantity Surveyor and Engineer is not to be more than 50mm high.	
B	**PRIME COST SUMS** i) The words "Prime Cost" (or the initials "P.C") appearing in the contract documents shall mean net costs exclusive of any trade, cash or other discount whatsoever but inclusive of the costs of the packing, carriage and delivery. Such costs shall be the same due to the sub-contract or supplier after adjustments where applicable in respect of measurements of rates. ii) Any increase or decrease in the prime costs sums resulting from the adjustments and properly paid by the contractor shall be added or deducted from the contract sum in the final account. In substantiation the contractor will require to produce to the Quantity Surveyor all quotations, invoices and receipted accounts as shall be necessary to show the details of the sums actually paid. iii) Any sum added by the contractor in these Bills of Quantities in respect of profits upon any prime costs will be deducted at the final settlement of accounts and the sum will be added to the amount of which will bear the same proportion to the sum added as the net amount properly expended to the original P.C sum. The profit is a management fee for arranging and taking responsibility of the sub-contract works or arranging for and checking the supply of materials and goods from nominated suppliers.	
	Carried to collection	

ITEM	DESCRIPTION	AMOUNT
A	NOMINATED SUB-CONTRACTORS The contractor shall accept responsibility for providing the following services for nominated sub-contractors. i) GENERAL ATTENDANCE: The following services are described as "allow for general attendance" . This shall mean: a) Use for the purpose of the sub-contract works of any scaffolding belonging to or provided by the contractor while it remains so erected upon site, provided that no warranty or other liability on the part of the contractor or of his other sub-contractors shall be created or implied in regard to the fitness, condition or suitability of the said scaffolding b) Provision of water, lighting, watching and attendance for the purpose of the sub-contract works. c) Use of sanitary accommodation, mess rooms and welfare facilities. d) Provision of space for erecting of offices or stores or space for storage of plant and materials. ii) SPECIAL ATTENDANCE: The following services are described as "allow for special attendance" . This shall mean: a) Taking delivery and including the provision of unskilled labour necessary to attend upon the sub-contractors workmen for the purpose of unloading plants/equipment and materials of significant weight and/or size, when received upon the site and placing in position within the sub-contractor's storage space or store. b) Special Scaffolding, scaffolding additional to the Contractors scaffolding or Reassembling of contractor's scaffolding. c) Facilitating special power requirements during the course of the works. **Carried to collection**	

ITEM	DESCRIPTION	AMOUNT
	CLAIMS	
A	It shall be a condition of this contract that upon it becoming reasonably apparent to the Contractor that he has incurred losses and / or expenses due to any of the contract conditions, or by any other reason whatsoever, he shall present such a claim or intent to claim notice to the Engineer within the contract period. No claim shall be entertained upon the expiry of the said contract period.	
	PAYMENTS	
B	The tenderer's attention is drawn to the fact that the payments shall be made in accordance with Clause 14 of the Conditions of Contract Agreement. In order to facilitate this, a list of the general component elements for the works is given at the summary page of these specifications and the tenderer is requested to break down his tender sum commensurate to the said elements.	
	PREVENTION OF ACCIDENT, DAMAGE OR LOSS	
C	The Contractor is thus instructed to take reasonable care in the execution of the works as to prevent accidents, damage or loss and disruption of activities being carried out. The Contractor shall allow in his rates any expense he deemed necessary by taking such care within the site.	
	Carried to collection	

ITEM	DESCRIPTION	AMOUNT
A	**NOMINATED SUPPLIERS** The contractor shall take delivery all materials or goods supplied by the Nominated suppliers and shall sign a receipt as having received them in good order and condition. He shall offload, transport to site, unload, hoist, provide safe storage and thereafter be responsible for any loss or damage or replacement of any such lost or damaged articles at his own expense and shall return case if so required. Provision is made herein following each appropriate P.C sums for the costs of the foregoing services against items reading "take delivery of and fix only" Fix Only:- "Fix Only" shall mean take delivery to site, unload, store, unpack, assemble as necessary, distribute to position, hoist and fix only.	
B	**DIRECT CONTRACTS** Notwithstanding the foregoing conditions, the Government reserves the right to place a "Direct Contract" for any goods or services required in the works which are covered by a P.C. Sum in the Bills of Quantities and to pay for the same direct. In any such instances, profit relative to the P.C. Sum in the priced Bills of Quantities will be adjusted as described for P.C. Sums is allowed.	
C	**PROTECTION OF THE WORK** The Contractor shall cover up and protect all finished work liable to damage including provision of temporary roof, gutters, drains etc until the completion of the works. In the event of any damages occurring to the works, materials, sewers, drains, gullies, paths or other works on site in temporary possession of the contractor for the purpose of this contract either from weather, want of proper protection, defects, or insufficiency of the works or any other causes or whatsoever during the progress of the works, the contractor shall be responsible and without extra charge, make good all damage and pay all costs which may be levied.	
D	**BLASTING OPERATIONS** Blasting will only be allowed with the express permission of the Engineer in writing. All blasting operations shall be carried out at the Contractor's sole risk and cost in accordance with any Government regulations in force for the time being, and any special regulations laid down by the Engineer governing the use and storage of explosives.	
	Carried to collection	

ITEM	DESCRIPTION	AMOUNT
	PREVENTION OF NUISANCE	
A	The works and such sections of the site necessary thereafter shall be under the entire care and control of the contractor during the whole period of the contract and shall take all possible precautions to prevent any nuisance, inconvenience or injury to the holder or occupiers of the existing or surrounding properties and to the public generally, and shall at all times keep all paths and roads affected by the works in a safe and clear state, and shall use proper precautions to ensure the safety of all wheeled traffic and pedestrians. The contractor shall provide appropriate screens to seal off the working area.	
	REMOVAL OF PLANT AND RUBBISH ETC	
B	The Contractor shall upon completion of the works remove and clear away all temporary buildings, plant, rubbish and unused materials, and shall leave the whole of the site of the works in a clean and tidy state to the satisfaction of the Engineer. He shall also remove all rubbish and dirt from the site at intervals or as directed by the Engineer. Particular care shall be taken in leaving windows, floors and fittings clean and the removal of all paint and cement stains therefrom. The contractor is expected to have established a well planned method of solid disposal of debris/garbage on and off the camp site	
	CONTRACTOR'S SUPERINTENDENCE/SITE AGENT	
C	The Contractor shall constantly keep on the works a literate English speaking Agent or Representative, competent and experienced in the kind of work involved who shall give his whole experience in the kind of work involved and shall give his whole time to the superintendence of the works. Such Agent or Representative shall receive on behalf of the Contractor all directions and instructions from the Engineer and such directions shall be deemed to have been given to the Contractor in accordance with the Conditions of Contract.	
	Carried to collection	

ITEM	DESCRIPTION	AMOUNT
	TRAINING LEVY	
A	The Contractor's attention is drawn to legal notice No. 237 of 2007 which requires payment by the Contractor for a training levy and the contractor shall allow in the preliminaries of this contract (basic rates column) for all costs arising or resulting therefrom. Proof of payment of this Levy should be provided at the request of the Engineer	
	STANDARDS LEVY	
B	The Contractor is required to make payments to the Kenya Bureau of Standards as Standard Levy inline with the current current and prevailing regulations. The Contractor shall allow in the Preliminaries of this Contract for all costs arising or resulting therefrom.	
	VALUE ADDED TAX (V.A.T.)	
C	The Contractor's attention is drawn to V.A.T PUBLIC NOTICE NO. 6 of 5th August, 1993 regarding the Finance Bill 1993 which expanded the V.A.T base to cover construction services amongst other items. The Contractor's attention is also drawn to all other notices issued by the government in relation to taxation. The Contractor shall familiarise himself with the said notices and allow in all his Bills of Quantities rates (Excluding P.C and Provisional Sums) for the net tax. (i.e less input tax where applicable) as required by law. Please note that allowing a lump sum tax either in preliminaries or in summary page shall not be acceptable. Any additional information and assistance concerning the application of the said notice should be directed to the office of the Commissioner of Value Added Tax

SPECIFICATIONS

Reference is made to the General Specifications for Building Works (1976) by the Ministry of Works, Housing and Physical Planning.

A copy is available for perusing at the request of the procuring entity.

Contractors are required to adhere to the latest industry standards as outlined in the most recent version of KS (Kenyan Standards). Failure to comply may result in project delays or financial penalties. It is the responsibility of the Contractor to stay informed about and apply the current industry standards throughtout the construction process. Any disputes arising from non-compliance with updated standards will be subject to resolution through dispute resolution mechanism outlined in the contract.

BUILDER'S WORK HOSTEL BLOCK

ITEM	DESCRIPTION	UNIT	QTY	RATE	AMOUNT
	BILL NO.1 - HOSTEL BLOCK (G+9)				
	ELEMENT NO 1 - SUBSTRUCTURES (ALL PROVISIONAL)				
	Site Clearance				
A	Clear site of all grass, hedges, shrubs, bushes including grubbing up of roots, cart away arising debris and burn them.	SM	1326		
	Excavations				
B	Excavate for vegetable soil average 200 mm deep: and set aside for later reuse in landscaping	SM	1326		
C	Excavate mechanically for raft foundation,depth not exceeding 1.5 metres commencing from stripped level.	CM	1989		
D	Ditto exceeding 1.5m deep but not exceeding 3.0 metres	CM	1989		
E	Extra over excavation for excavating in soft rock	CM	1326		
	Disposal of water				
F	Allow an item for keeping all excavations free from all spring and running water by pumping or any other such means.	Item	1		
	Planking and strutting				
G	Allow an item for maintaining and upholding the sides of excavations and keeping excavations clear of all fallen materials.	Item	1		
	Carried to collection				

ITEM	DESCRIPTION	UNIT	QTY	RATE	AMOUNT
	Disposal of excavated materials				
A	Load,wheel and cart away surplus excavated material away from site	CM	3978		
	Fillings				
B	Make up levels with approved imported materials: compacted mechanically in layers not exceeding 300mm thick to the entire satisfaction of the Structural Engineer.	CM	1989		
C	300mm thick hardcore filling,hand packed and compacted in layers not exceeding 150mm thick to the entire satisfaction of the Structural Engineer;with 50mm Thick murram blinding or "equal and approved" on top surface (measured separately)	SM	1326		
D	50 mm Thick Murram Blinding to surfaces of hadcore	SM	1326		
	Anti - termite to treatment				
E	Approved anti-termite chemical treatment with 10 years guarantee,sprayed to the surfaces of hardcore in strict adhearence to manufacture's instruction.	SM	1326		
	Damp-proof membrane				
F	1000 gauge polythene or other equal and approved damp-proof membrane, laid over blinded hardcore (measured separately) with 300mm side and end laps (measured nett-allow for laps)	SM	1326		
	Insitu class 15 / 20 mm aggregates as described in:				
G	50 mm Thick under raft foundation	SM	1326		
	Insitu concrete class 25 (20mm maximum aggregate size):vibrated and reinforced:				
H	Raft foundation	CM	2419		
I	Columns	CM	47		
J	200mm thick lift shaft wall	SM	36		
K	200mm thick reinforced concrete retaining wall	SM	146		
L	100mm thick surface bed	SM	1326		
	Carried to collection				

ITEM	DESCRIPTION	UNIT	QTY	RATE	AMOUNT
	Ribbed reinforcement bars to KS 573:2014 : , Grade 500 high tensile strength, Including all necessary bends, hooks, tying wires and distance blocks (Provisional):				
A	Assorted reinforcement	Kg	65631		
	Mesh fabric reinforcement to K/EAS 412;2 (2019)BRC A142; 200 x 200mm, weighing 2.22kg/m² (measured net - no allowance for laps; in two layers - top & bottom; including bends, tying wire and spacer blocks				
B	In ground slab	SM	1326		
	Modular steel frame with steel plates covering formwork and/or marine board formwork: to:				
C	Sides of raft Foundations	SM	268		
D	Vertical sides of columns	SM	477		
E	Ditto lift shaft wall	SM	72		
F	Ditto lift reinforced concrete retaining wall	SM	292		
G	Edge of groundslab : exceeding 75mm but not exceeding 150mm	LM	244		
	Plinth				
	25mm Thick cement and sand (1:4) render on concreteor masonry ; wood float finished; to				
H	Plinths; externally.	SM	147		
	Two coats black bituminous paint on:				
I	Rendered surfaces	SM	147		
	Pavings in the Void				
J	Supply and lay 600 x 600 x 50mm reinforced concrete precast paving slabs around the building including laying, spreading and compacting 100mm thick approved sand bed blinding, on and including 150mm thick compacted hardcore to Engineer's approval.	SM	353		
	Carried to collection				

ITEM	DESCRIPTION	UNIT	QTY	RATE	AMOUNT
	Waterproofing				
	CRYSTALLINE WATERPROOFING				
	All areas indicated shall be waterproofed by the MASTERSEAL® 501/502 system as manufactured by BASF, or equal and approved, provide 10 year guarantee, all to manufacturer's specifications and instructions as described:				
	Two coat slurry application: MASTERSEAL® 501: 1kg per m2 per coat, minimum 2 coats to seal all expansion joints, holes, repaired areas and angle fillet				
	Application of render coat: MASTERSEAL® 502: 1kg per m2 at 4.5mm thick on slabs. Rate shall allow for hacking and preparing all concrete surfaces				
A	Vertical surfaces of Lift shaft walls	SM	36		
B	Ditto retaining walls	SM	292

	Supply, Install, Test, Commission and Set to work:-				
11.06	Lighting points wired in 3x1.5mm2 PVC insulated single core (SC) copper cables drawn in 20mm diameter HG PVC conduit concealed in walls and or floor slabs with all accessories but excluding switch and fitting for one way switching.	No.	32		
11.07	Supply and install 20A 4 poles AC3 duty contactor mounted on DIN rails in the sub-board for external lighting circuits inclusive of wiring to contactor coil.	No.	1		
11.08	Supply and install Programmable digital time switch with minimum 100 hours reserve and over-ride facility for external lighting.	No.	1		
	Supply, deliver to site and install the following complete with lamps, control gear/drivers as approriate including fixings and supports:		1		
11.09	Type WL- IP65 External bulkhead fitting	No.	30		
11.10	Type SL-Street lights 50W c/w 6m pole, integrated, 90AH, 2V Lithium battery, solar panel, and intelligent dusk to dawn controls	No.	14		
11.11	Gate lights 50W	No.	2		
	SPECIALIZED ITEMS CABLE WAYS				
	CCTV POINTS				
11.12	CCTV points drawn in 25mm diameter heavy gauge PVC conduits conceiled in wall and floor slabs including all conduit accessories and draw wire but excluding cabling and termination kits	No.	12

12.00 BILL NO.12: FIRE ALARM SYSTEM

ITEM	DESCRIPTION	UNIT	QTY	RATE	AMOUNT
12.01	Microprocessor based 2-Loop Addressable Fire Alarm Control Panel	No.	1		
12.02	Addressable Photoelectric Smoke Detector	No.	200		
12.03	Addressable Heat Detector as Menvier or Approved equivalent	No.	40		
12.04	Addressable Manual Fire Alarm 'Break Glass' call points	No.	40		
12.05	Addressable Electronic Fire Alarm sounder complete with Red Flashing beacon	No.	40		
12.06	Microprocessor based Addressable Fire Alarm Repeater Panel	No.	1		
12.07	2x2.5mm2 FP 200 Network cables for connecting the above panels.	Lm	180		
12.08	Demonstrate operation of the complete fire alarm system in presence of manufacturer's representative	Item	1		
12.09	Connect, test, program and commission the fire alarm system and provide log and schedule of active devices	Item	1		
12.10	Operation manuals and 3 sets of record drawings both hard and soft copies	Item	1		
	Total Carried to Electrical Installation Summary Page				

13.00 **BILL NO.13: LIGHTNING PROTECTION**

Item	DESCRIPTION	UNIT	QTY	Rate (KES)	Amount (KES)
	Supply, Install, Test, Commission and Set to work:-				
	Air Termination				
13.01	2000mm x15mmØ multiple point pure copper AirRods/ Termination with spikes as Furse Part No. RA240 or approved equivalent	No	2		
13.02	Copper Air Rod Base as Furse Part No. SD105-H or approved equivalent	No□	□		
13.03	Copper Junction Clamps for copper tape as Furse Part No. CN105-H or approved equivalent	No□	□		
13.04	25x3mm copper tape TC030 on tape clip Furse CP210 including saddles, appropriate bonding & jointing clamps to bond and clamp the tape to masonry wall.	Lm	400		
	Down Conductor				
13.05	32mm diameter HG concealed PVC conduit with factory made bends, all conduit fittings as shown on drawing.	Lm	80		
13.06	70mm2 bare copper conductor enclosed HG concealed PVC conduit between copper tape and test joint (down conductor).	Lm	100		
13.07	Screwdown copper test clamp as Furse CT305 or approved equivalent	No□	□		
	Earth Termination				
13.08	Supply and install earthing complete with Earthing Matt measuring 1000x1000mm build in 25mm x 3mm thick riveted with copper rivets. 2Nos. Earth electrodes, and 2Nos. Rod to tape clamps. The earth matt to be treated by marconite and salt to obtain reading <10.0 ohms.	No.	2		
13.09	70mm2 ECC in 1x25mm dia PVC conduit between the test clamp and the earth rods.	Lm	10		
13.10	Concrete earthing inspection pits	No	2		
13.11	Test the completed lightning protection system and log in results	Item	1		
	Bonding				
2.13	Bonding and clamping to all metal work including water pipes, gas pipes, hand-rails, smatv system, window frames, cladding, metal roof etc. and the main earth for the building.	Item	1

GUARD HOUSE

Item	Description	Unit	QTY		
	PROPOSED GUARD HOUSE				
	BILL NO.1-BUILDERS WORKS				
	ELEMENT NO 1 - SUBSTRUCTURES (ALL PROVISIONAL)				
	Site Clearance				
A	Clear site of all grass, hedges, shrubs, bushes grub up roots, load and remove from site and dispose at designated local authority areas.	SM	15		
B	Excavate average 300mm deep to remove top vegetable soil, load, remove from site and dump in designated local authority dump site.	SM	15		
C	Excavate for Strip foundations depth not exceeding 1.50 metres starting from Reduced ground levels.	CM	10		
D	Ditto to column bases	CM	2		
E	Extra over all type of excavation for excavating in soft rock	CM	1		
F	Ditto excavation in hard rock class I	CM	1		
	Disposal of water				
G	Allow for keeping the whole of the excavation free from all spring and running water by pumping or any other such means as may be necessary	Item			
	Planking and strutting				
H	Allow for maintaining and upholding the sides of excavations and keeping excavations clear of all fallen materials, rubbish etc	Item			
	Carried to collection				

Item	Description	Unit	QTY		
	Disposal of excavated material				
A	Load,wheel and cart away surplus excavated material to a Local Authority designated dumping site or fill soil heaps as away from site instructed by the Project Engineer.	CM	1.00		
B	Return, fill and ram selected excavated material around sides of foundations.	CM	12		
	Fillings				
C	Make up levels using approved imported materials: compacted in layers not exceeding 300mm thick with a roller: to the satisfaction of the Structural Engineer.	CM	0		
D	300mm thick hardcore bed: hand packed : compacted in layers not exceeding 150mm thick: to the satisfaction of the Structural Engineer	SM	12		
E	50 mm Stone dust/ Murrum blinding to surfaces of hardcore	SM	15		
	Anti - termite to treatment				
F	Approved anti-termite treatment, with ten-year guarantee, sprayed to surfaces of hardcore strictly in accordance with manufacturer's instructions.	SM	15		
	Damp-proof membrane				
G	1000 gauge polythene or other equal and approved damp-proof membrane, laid over blinded hardcore (measured separately) with 300mm side and end laps (measured nett-allow for laps); 1 No. layer: bedded in and including cement and sand (1:3) mortar	SM	15		
	Concrete Blinding				
	Insitu concrete Class 15MPa: vibrated:				
H	50 mm thick blinding under column bases	SM	6		
I	50 mm thick blinding under strip foundations	SM	8		
	In- situ vibrated reinforced concrete Class 25 MPa: in:				
J	Column bases	CM	2		
K	Strip foundations	CM	2		
L	100mm thick surface bed	SM	15		
M	Steps **In- situ vibrated reinforced concrete Class 25 MPa: in:**	CM	0		
N	Columns	CM	1		
	Carried to collection				

Item	Description	Unit	QTY		
	Ribbed reinforcement steel bars to KS 573:2014 : Grade 500 high tensile strengthincluding bends, hooks, tying wire and distance blocks; to S.E's detail (Provisional)				
A	Assorted reinforcement	KGS	264		
	Mesh fabric reinforcement to K/EAS 412;2 (2019) BRC A142;200 x 200mm, weighing 2.22kg/m² (measured net - no allowance) for laps; in two layers - top & bottom; including bends, tying wire and spacer blocks)				
B	In ground floor slab	SM	15		
	Modular steel frame with steel plates covering formwork and/or marine board formwork: to:				
C	Sides of column bases	SM	7		
D	Vertical sides to columns	SM	8		
E	Edge of slab not exceeding 150mm girth	LM	15		
F	Edges of risers 75 - 150mm high	LM	14		
	Foundation Walling				
	Natural quarry stone walling with a minimum of 7.0 N/mm2 bedded and jointed in cement and sand (1:4) mortar, reinforced with and including 25 x 3 mm thick hoop iron strips at every alternate course as described in;				
G	200mm thick walls in foundations	SM	18		
	Pavings				
H	Supply and lay 600 x 600 x 50mm reinforced concrete precast paving slabs around the building including laying, spreading and compacting 100mm thick approved sand bed blinding, on and including 150mm thick compacted hardcore to Engineer's approval.	SM	7		
	Plinth				
	25mm Thick cement and sand (1:4) rendering on concrete or masonry ; wood float finished; to				
J	Plinths externally	SM	5		
	Two coats black bitumastic paint on:				
K	Rendered surfaces	SM	5		
	Carried to collection

	ELEMENT No 3-WALLING				
	WALLING				
	External Walling				
	Machine cut quarry stone walling with a minimum of 7.0 N/mm2 average compressive strength; bedded and jointed in cement and sand (1:4) mortar, reinforced with and including 25 x 3 mm thick hoop iron strips at every alternate course as described in;				
A	200mm thick walling Externally	SM	24		
B	200mm thick parapet walling	SM	6		
	Internal Walling				
	Machine cut quarry stone walling with a minimum of 7.0 N/mm2 average compressive strength; bedded and jointed in cement and sand (1:4) mortar, reinforced with and including 25 x 3 mm thick hoop iron strips at every alternate course as described in;				
C	200mm thick walling Internally	SM	5		
D	150mm thick walling Internally	SM	0		
E	Approved hessian based damp proof course to 200mm thick walling in cement/sand mortar	LM	11		
F	Approved hessian based damp proof course to 150mm thick walling in cement/sand mortar	LM	0		
	Precast Concrete Breeze Ventilation Blocks				
G	150 x 150mm wide x 50mm thick Pre Cast Concrete flower 3D breeze ventilation blocks bedded and jointed in cement and sand (1:4) mortar	SM	0		
	COPING				
H	300 x 100mm insitu reinforced concrete class 20Mpa coping, throated and weathered and jointing to columns with cement sand 1:4 mortar	LM	11		
	Lintols				
I	200mm x 200mm Deep lintols in reinforced concrete class 20MPa with and including 4No T10 and T8 stirups at 200mm centres; complete with formwork	LM	2		
	ELEMENT NO. 3 Carried to WALLING Main summary				

Item	Description	Unit	QTY		
	PROPOSED GUARD HOUSE				
	BILL NO.1-BUILDERS WORKS				
	ELEMENT NO 4-WINDOWS				
	MILD STEEL WINDOWS				
	Supply, fabricate and fix the following purpose made small pane mild steel casement windows to be fabricated from approved mild steel sections (atleast 14g 2mm thick) comprising of frame and casement incorporating permanent hooded high level ventilation panels infilled with mosquito gauze : window supplied complete with and including 12mm solid square burglar proofing bars fixed at 200mm centres both ways and metal fixing lugs including building into wall and making good, and all necessary iron mongery viz hinges, fasteners, and hasp including shop priming window with red oxide primer before delivery to site:-				
	A prime cost sum of Kshs 4,500 per Sqm has been allowed for fabrication of the above specified Steel casement Windows by AHP juakali artisans as approved by the Project Manager/Architect.				
	The contractor's unit rate shall include the cost of transport, storage, fixing and all associated accesories in addition to the PC Rate.				
A	Window, overall size 1900 X 1500mm high to Architects Details	NO	1		
B	Ditto Size 650 x 1500mm high (bedroom)	NO	1		
C	Ditto Size 1000 x 1350mm high (Kitchen)	NO	0		
D	Ditto Size 600 x 900mm high (WC/SH)	NO	1		
	Glazing				
E	4mm Thick clear sheet glass panes over 0.1 but not exceeding 0.5 square meters; fixing with premium putty	SM	4		
F	Ditto; obscure	SM	1		
	Painting and Decorations				
	On Metal work				
	Prepare and apply aerosol spray painting in one finishing coats of approved first grade to: -				
G	General window and grille surfaces; over 300mm girth internal	SM	4		
	Carried to Collection				

Item	Description	Unit	QTY		
	Precast concrete window cill finishing fair on all exposed surfaces and hoisting and placing in position, bedding, jointing and pointing in pigmented cement and sand (1:3) mortar				
A	150 x 25mm thick Precast concrete window sill	LM	3		
	Carried to collection

	BILL NO.1-BUILDERS WORKS				
	ELEMENT NO 5-DOORS				
	External Doors				
	Flush timber doors				
	50 mm thick Semi Solid cored flush doors with plywood facing to receive painting (m.s) all to Architects details, specifications and approval				
	A prime cost sum at the rate indicated below for fabrication of the above specified Timber Flush door leaves by AHP juakali artisans as approved by the Project Manager/Architect.				
	The contractor's unit rate shall include the cost of transport, storage, fixing and all associated accesories in addition to the PC Rate.				
A	Door size 900mm x 2400mm High comprising of 1 No Opennable leaf size 800 x 2100mm high including fixed fanlight size 900 x 300mm high in 4mm clear glass (measured separetely) (PC Rate Kshs 4,000)	NO	2		
B	Ditto 800 x 2100mm high comprising of 1No. Opennable leaf size 700 x 2100mm high (PC Rate Kshs 3,500)	NO	0		
	4mm Thick clear sheet glass fixing with matching timber glazing beads to timber frames				
C	In panes exceeding 0.1 sqm but not exceeding 0.5 square metres.	SM	1		
	Frames and frame finishes in cypress Timber				
D	25 x 25mm quadrant (PC Rate Kshs 75)	LM	5		
E	25 x 50mm architrave with two labours, plugged (PC Rate Kshs 150)	LM	8		
F	150mm x 50mm transome with three labours; chamfered edges; plugged (PC Rate Kshs 800)	LM	8		
G	150mm x 50mm frame with three labours; chamfered edges; plugged (PC Rate Kshs 800)	LM	8		
	Carried to collection				

Item	Description	Unit	QTY		
	Painting and decorating				
	Priming back of frame with an aluminium or equivalent and approved wood primer				
A	Surfaces not exceeding 100mm girth	LM	13		
B	Surfaces over 100mm but not exceeding 200mm girth	LM	15		
	Prepare Knot, prime, stop and apply one undercoat and two finishing coats first grade timber quality paint to wood surfaces as per the manufacturer's printed instructions				
C	General timber surfaces	SM	9		
D	Surfaces over 200mm but not exceeding 300mm girth	LM	15		
E	Architraves: not exceeding 100 mm girth	LM	8		
F	Quadrant beading : not exceeding 100 mm girth	LM	5		
	Ironmongery				
	Supply and fix the following ironmongery to timber complete with matching screws and keys to the approval of the Architect				
G	100mm pressed steel Butt Hinges	PRS	3		
H	Stainless steel 3 Lever Mortice Door Lock with handle furniture set;(keyhole escutcheons, cylinder and latch)	NO	0		
I	Ditto: but 2 Lever Door Lock with handle	NO	2		
J	Door fixing cramps	NO	0		
K	200 x 75 x 3mm perspex door signage with door numbers as per Architect detail	NO	2		
	Carried to Collection

Item	Description	Unit	QTY		
	PROPOSED GARBAGE RECEPTACLE				
	BILL NO.1-BUILDERS WORKS				
	ELEMENT NO 1 - SUBSTRUCTURES (ALL PROVISIONAL)				
	Site Clearance				
A	Clear site of all grass, hedges, shrubs, bushes grub up roots, load and remove from site and dispose at designated local authority areas.	SM	112		
B	Excavate average 300mm deep to remove top vegetable soil, load, remove from site and dump in designated local authority dump site.	SM	112		
C	Excavate for Strip foundations depth not exceeding 1.50 metres starting from Reduced ground levels.	CM	68		
D	Ditto to column bases	CM	4		
D	Extra over all type of excavation for excavating in soft rock	CM	7		
E	Ditto excavation in hard rock class I	CM	0		
	Disposal of water				
F	Allow for keeping the whole of the excavation free from all spring and running water by pumping or any other such means as may be necessary	Item			
	Planking and strutting				
G	Allow for maintaining and upholding the sides of excavations and keeping excavations clear of all fallen materials, rubbish etc	Item			
	Carried to collection				

Item	Description	Unit	QTY		
	Disposal of excavated material				
A	Load,wheel and cart away surplus excavated material to a Local Authority designated dumping site or fill soil heaps as away from site instructed by the Project Engineer.	CM	2		
B	Return, fill and ram selected excavated material around sides of foundations.	CM	70		
	Fillings				
C	Make up levels using approved imported materials: compacted in layers not exceeding 300mm thick with a roller: to the satisfaction of the Structural Engineer.	CM	0		
D	300mm thick hardcore bed: hand packed : compacted in layers not exceeding 150mm thick: to the satisfaction of the Structural Engineer	SM	112		
E	50 mm Stone dust/ Murrum blinding to surfaces of hardcore	SM	112		
	Anti - termite to treatment				
F	Approved anti-termite treatment, with ten-year guarantee, sprayed to surfaces of hardcore strictly in accordance with manufacturer's instructions.	SM	112		
	Damp-proof membrane				
G	1000 gauge polythene or other equal and approved damp-proof membrane, laid over blinded hardcore (measured separately) with 300mm side and end laps (measured nett-allow for laps); 1 No. layer: bedded in and including cement and sand (1:3) mortar	SM	112		
	Concrete Blinding				
	Insitu concrete Class 15MPa: vibrated:				
H	50 mm thick blinding under column bases	SM	14		
I	50 mm thick blinding under strip foundations	SM	45		
	In- situ vibrated reinforced concrete Class 25 MPa: in:				
J	Column bases	CM	4		
K	Strip foundations	CM	9		
L	100mm thick surface bed	SM	112		
M	Columns	CM	1		
	Carried to collection				

Item	Description	Unit	QTY		
	Ribbed reinforcement steel bars to KS 573:2014 : Grade 500 high tensile strengthincluding bends, hooks, tying wire and distance blocks; to S.E's detail (Provisional)				
A	Assorted reinforcement	KGS	812		
	Mesh fabric reinforcement to K/EAS 412;2 (2019) BRC A142;200 x 200mm, weighing 2.22kg/m² (measured net - no allowance) for laps; in two layers - top & bottom; including bends, tying wire and spacer blocks)				
B	In ground floor slab	SM	112		
	Modular steel frame with steel plates covering formwork and/or marine board formwork: to:				
C	Sides of column bases	SM	17		
D	Sides of Strip foundations	SM	30		
E	Vertical sides to columns	SM	17		
F	Edge of slab not exceeding 150mm girth	LM	43		
	Foundation Walling				
	Natural quarry stone walling with a minimum of 7.0 N/mm2 bedded and jointed in cement and sand (1:4) mortar, reinforced with and including 25 x 3 mm thick hoop iron strips at every alternate course as described in;				
G	200mm thick walls in foundations	SM	98		
	Pavings				
H	Supply and lay 600 x 600 x 50mm reinforced concrete precast paving slabs around the building including laying, spreading and compacting 100mm thick approved sand bed blinding, on and including 150mm thick compacted hardcore to Engineer's approval.	SM	45		
	Plinth				
	25mm Thick cement and sand (1:4) rendering on concrete or masonry ; wood float finished; to				
J	Plinths externally	SM	30		
	Two coats black bitumastic paint on:				
K	Rendered surfaces	SM	30

BASKET BALL PITCH

ITEM	DESCRIPTION	UNIT	QTY	RATE	AMOUNT
	PROPOSED APARTMENTS FOR AFFORDABLE HOUSING PROGRAM (BASKET BALL PITCH)				
	BILL NO.8 BUILDERS WORKS				
	Oversite Excavation				
A	Clear site of all grass, hedges, shrubs, bushes grub up roots, load and remove from site and dispose at designated local authority areas.	SM	925		
B	Excavate average 200mm deep to remove top vegetable soil, load, remove from site and dump in designated local authority dump site.	SM	925		
C	Excavate to reduced levels in varying depths not exceeding 1.5m deep from existing ground levels.	CM	324		
D	Load and cart away excess excavated materials as directed on site.	CM	324		
	TOTAL FOR EXCAVATIONS CARRIED TO SUMMARY				

ITEM	DESCRIPTION	UNIT	QTY	RATE	AMOUNT
	ELEMENT NO. 2 - BASKET BALL COURT				
	(All provisional)				
	Sub-Grade				
A	Roll and compact subgrade formation to achieve 98% modified proctors MDD including grading to falls and crossfalls	SM	574		
B	Imported and approved murram backfill materials to make up levels, well watered, rolled and compacted to 98% MDD at optimum moisture content in layers not exceeding 150mm Thick to Engineer's approval	CM	201		
	Sub-Base				
C	150mm thick Compacted gravel 3.5mm in sub-base laid at a slope of 1%well watered and compacted to 98% MDD at optimum moisture content in layers each of 150mm Thick to Engineer's approval	SM	574		
	FINISHINGS				
D	**ASPHALT FINISH**				
	Prepare surface and spray MC-30 as a prime coat cutback bitumen at a rate of 0.8 -1.0 lt/m2 as prime coat.	SM	574		
E	Prepare primed surfaces, provide and spray K1-60 bitumen emulsion as tack coat at a spray rate of 0.8 - 1.0 lt/m2 as directed by Engineer.	SM	574		
F	75mm thick Asphalt concrete for surfacing	SM	574		
	Channels				
G	Provide, lay and joint Channel, 125x150mm flush channel block, laid on and including 450x100mm concrete (1:3:6) bed and 100x200mm haunching behind ancluding any necessary formwork and disposal of surplus material as directed.	LM	69		
	TOTAL FOR BASKET BALL COURTS CARRIED TO SUMMARY				

ITEM	DESCRIPTION	UNIT	QTY	RATE	AMOUNT
	ELEMENT NO. 3 - WATER DRAINAGE AROUND THE PITCH				
	FRENCH DRAIN				
	Oversite Excavation (All excavations Measured Net)				
	Excavate for French Drain average depth not exceeding 1500mm Deep, uphold the sides of excavation, keep excavations free from water, trim and compact the bottom of excavation to level and cart away the resultant excavated materials as directed on site as described in:				
A	Main-drain	CM	97		
B	Ditto to Sub-drain	CM	5		
	Mass concrete (class 15/20) in;				
	50mm Thick Class 15/20 mass concrete blinding to bottom of trenches to receive drain pipe as described in:				
C	Main-drain	SM	65		
	<u>Underground Drain Pipe.</u>				
D	Supply, lay including necessary jointing and connections approved HDPE Perforated Pipe all to approval as decribed in:				
E	200mm Diameter main drain.	LM	108		
	<u>Hesian Filter Fabric</u>				
F	Supply and lay approved hesian Filter Fabric to french drains girth 600mm wide.	LM	108		
G	Ditto girth 300mm wide.	LM	34		
	Carried to collection				

ITEM	DESCRIPTION	UNIT	QTY	RATE	AMOUNT
	Drain Fillings.				
A	Approved imported hardcore fillings over perforated underground pipe in main drain.	CM	15		
B	Ditto above formation level on subdrains.	CM	3		
C	Supply and place approved 200mm graded aggregates ballast fillings over perforated underground pipe in main drain.	CM	26		
D	Ditto above formation level on subdrains.	CM	2		
E	Supply and place approved sand fillings over perforated underground pipe in main drain.	CM	13		
F	Ditto above formation level on subdrains.	CM	2		
	Inspection chambers				
G	Construct 600 wide x 600 mm long x 1500 mm deep (internal dimensions) storm water manhole, comprising 150 mm thick concrete class 20 bed, 200 mm thick natural stonewalling in cement and sand (1:3) mortar, 150 mm thick concrete class 20 cover slab with requisite reinforcement, 450x 600 mm heavy duty cast iron cover and frame bedded in cement and sand (1:3) mortar; internally plastered & screeded in 15 mm thick lime plaster; 100 mm thick concrete class 20 benching; complete with necessary excavation, formwork and2 No. connections to pipes not exceeding 200 mm diameter(pipe m/s)	NO.	7		
	Carried to Collection				
	Collection: Brought forward from page BP/3 Brought forward from page Above				
	TOTAL FOR WATER DRAINAGE AROUND THE PITCH CARRIED TO SUMMARY				

ITEM	DESCRIPTION	UNIT	QTY	RATE	AMOUNT
	ELEMENT NO. 4 - BASKET BALL GOAL POSTS				
	Excavation				
A	Excavation for Goal post sockets diameter 150mm wide average depth not exceeding 1500 mm from formed level.	CM	2		
	Disposal				
B	Load,wheel and cart away surplus excavated material to a Local Authority designated dumping site or fill soil heaps as away from site instructed by the Project Engineer.	CM	2		
	In- situ vibrated reinforced concrete Class 25 (20mm aggregates): in:				
C	Socket - bases & stud columns	CM	2		
	Ribbed reinforcement steel bars to KS 573:2014 : Grade 500 high tensile strengthincluding bends, hooks, tying wire and distance blocks; to S.E's detail (Provisional)				
D	Assorted reinforcement	KG	200		
	Formwork				
E	Sawn formwork with one coat of an approved retarding agent to vertical sides of socket bases	SM	8		
	Mild steel work in:-				
F	Achoring system anchoring in concrete including neoprene caps all as per manufacturer's instructions.	NO	4		
G	150mm Diamater x 4mm thick CHS sockets all removable.	LM	30		
	Prime stop and apply one undercoat and two finishing coats of gloss paint to CROWN PAINTS first quality or other equal and approved to metal surfaces of:				
H	General metal surfaces	LM	60		
	Goal net and ring				
I	Standard goal net and ring all to approval welded to steel post.	NO.	2		
J	25mm thick fibre glass block board all fixee to approval	SM	4		
K	Supply and fix 100mm thick polytheylene foam padding	SM	4		
L	Supply and fix 25mm thick rubber tubing all around 150mm diameter vertical posts	LM	6		
	TOTAL FOR GOAL POSTS CARRIED TO SUMMARY

BOUNDARY WALL

ITEM	DESCRIPTION	UNIT	QTY	RATE	AMOUNT
	BOUNDARY WALL				
	ELEMENT NO.1				
	SUBSTRUCTURES				
	(ALL PROVISIONAL)				
	Siteworks and Excavations				
A	Clear site of all grass, hedges, shrubs, bushes including grubbing up of roots, cart away arising debris and burn them.	SM	500		
	Excavations				
B	Excavate for Strip foundations depth not exceeding 1.50 metres starting groundlevel	CM	252		
C	Ditto to column base	CM	396		
D	Extra over excavation for excavating in soft rock	CM	6		
E	Allow for keeping the whole of the excavations free from all water; include for draining or other wise keeping all works free from water as necessary over the entire contract period		ITEM		
F	Allow for maintaining and upholding sides of excavations and keeping excavations clear of all fallen materials, rubbish etc		ITEM		
	Carried to Collection				

ITEM	DESCRIPTION	UNIT	QTY		
	SUBSTRUCTURES-(CONTINUED)				
	Disposal of excavated materials				
A	Return, fill and ram selected excavated material around foundations.	CM	366		
B	Load,wheel and cart away surplus excavated material away from site	CM	282		
	Insitu class 15 / 20 mm aggregates as described in:				
C	50mm Thick blinding to strip foundation	SM	168		
D	Ditto to column bases	SM	183		
	Insitu concrete class 20 (20mm maximum aggregate size):vibrated and reinforced:				
E	Strip footing	CM	34		
F	Ditto to column bases	CM	55		
G	Columns	CM	25		
H	Ground Beam	CM	14		
	Carried to Collection				

ITEM	DESCRIPTION	UNIT	QTY		
	SUBSTRUCTURES-(CONTINUED)				
	Modular steel frame with 5mm thick steel plates covering formwork and/or marine board formwork: to:				
A	Sides of stripfooting	SM	385		
B	Ditto ground beam	SM	135		
	Ribbed reinforcement steel bars to KS 573:2014 : Grade 500 high tensile strengthincluding bends, hooks, tying wire and distance blocks; to S.E's detail (Provisional)				
C	8mm diameter	KG	1953		
D	10 mm ditto	KG	1241		
E	12 mm ditto	KG	3009		
F	16 mm Ditto	KG	5896		
	Foundation Wall				
	Natural quarry stones rough dressed with a minimum compressive strength of 7.0N/mm2 average compressive strength bedded and jointed in cement and sand(1:4) mortar;reinforcced with 25 x 3mm thick iron strips at alternate courses.				
G	200mm Thick walling	SM	750		
	Carried to Collection

	REINFORCED CONCRETE SUPERSTRUCTURE				
	Insitu concrete class 20 (20mm maximum aggregate size):vibrated and reinforced:				
A	Columns	CM	53		
	Modular steel frame with steel plates covering formwork and/or marine board formwork: to:				
B	Vertical sides of columns	SM	616		
	Ribbed reinforcement steel bars to KS 573:2014 : Grade 500 high tensile strengthincluding bends, hooks, tying wire and distance blocks; to S.E's detail (Provisional)				
C	12mm diameter ditto	KG	2,149		
D	8mm diameter ditto	KG	1434		
	TOTAL FOR ELEMENT NO. 2 CARRIED TO				
	(REINFORCED CONCRETE) SUMMARY				

ITEM	DESCRIPTION	UNIT	QTY		
	ELEMENT NO. 3				
	WALLING				
	Smooth chisel dressed natural stone walling in cement and sand (1:4) mortar reinforced with and including 25 x 3mm thick hoop iron in every alternate course				
A	200mm Thick walling	SM	1200		
	Precast concrete class 20/20 coping as described in;				
B	450 x 450 x 50 mm thick column capping, four times weathered and throated, bedded and jointed in cement and sand(1:4) mortar	NO	183		
C	250mm wide x 50 mm thick wall coping twice weathered and throated, bedded and jointed in cement and sand morter (1:4) on stone walling (m.s.)	LM	500		
	TOTAL FOR ELEMENT NO. 3 (WALLING) CARRIED TO SUMMARY				

ITEM	DESCRIPTION	UNIT	QTY		
	ELEMENT NO. 4				
	EXTERNAL FINISHES				
A	Extra over walling for smooth chisel dressing with flush pointed vertical joints and recessed horizontal joints 10 mm rod in cement and sand mix (1:3) mortar including one coat of Bituminous paint	SM	2400		
	12mm (minimum) two coat lime plaster complete with wire gauze anti-crack mechanism at the intersection of masonry walling and concrete beams as described to:-				
B	Columns	SM	616		
C	Ground beam	SM	135		
	GATES				
	Mild steel sections as described in;				
D	6000mm wide x 2400mm high double gate comprising of 50x50x3mm RHS framing and middle rail 50x25x3mm RHS Vertical infill members at 225mm centres;priming with red oxide primer; purpose made ironmongery; all necessary lugs and grouting as per details (all with roller at the ground)	NO	1		
E	Ditto pedestrian gate size 900x1800 ditto	NO	1		
	Prepare surfaces and apply two coats of first grade quality of gloss oil paint as manufactured by Crown Solo Paints or equal and approved on;				
F	General surfaces of metal	SM	33		
	TOTAL FOR ELEMENT NO. 4 CARRIED TO (EXTERNAL FINISHES) SUMMARY

CIVIL WORKS - ROADS

CIVIL WORKS					
BILL № 1: Preliminary and General Items					
ITEM	**DESCRIPTION**	**UNIT**	**QTY**	**RATE**	**AMOUNT**
1.01	Allow Provisional sum of Kenya shillings (KSh 500,000/=) for materials testing as instructed by the Engineer.	Prov. Sum	1	500,000.00	500,000.00
1.02	Extra Over on Item 1.01 for Contractors overheads and profits	%			
1.03	Allow a Prime Cost (P.C) sum of Kenya Shillings One Million (KShs. 1,000,000) for training of Engineers, Technicians and other support staff as maybe instructed by the Engineer.	PC Sum	1	1,000,000.00	1,000,000.00
1.04	Extra Over on Item 1.03 above for the Contractors overheads and profits	%			
BILL 1 TOTAL CARRIED TO SUMMARY PAGE					

BILL № 2: Site Clearance and Topsoil Stripping					
ITEM	**DESCRIPTION**	**UNIT**	**QTY**	**RATE**	**AMOUNT**
2.01	Clear site including removal of trees (girth less than 300 mm), hedges, bushes and other vegetation and other deleterious materials, grub up roots and backfilling of holes left by removal of stumps and roots in accordance with the Specifications, as shown on the drawings and as instructed by Engineer.	m2	2200.00		
2.02	Removal of top soil to a maximum depth of 200 mm including excavation, loading and disposal	m3	440.00		
2.03	Cutting of trees of all girth above 300 mm including cutting of trunks, branches, uprooting and removal of all materials and stacking within the Right of Way and complete with filling of depressions/pits by earth including liaison with concerned authorities for obtaining permissions.				
	(i) Girth from 300 mm to 600 mm	№	8		
	(ii) Girth above 600 mm but up to 900 mm	№	5		
	(iii) Girth above 900 mm but up to 1800 mm	№	3		
2.04	Transportation of the existing trees of girth above 600 mm girth as instructed by Engineer, including shifting of the tree and storing at locations as instructed by the Engineer.	№	8		
	Total of Bill № 2(Carried Forward to Summary				

BILL № 3: Earthworks					
ITEM	**DESCRIPTION**	**UNIT**	**QTY**	**RATE**	**AMOUNT**
	No separate payments shall be made for the overhaul of the material and the cost of such haulage shall be included in the rates and or prices.				
3.01	Cut to spoil in soft material	m3	1,150		
3.02	As Item 5.01 but in hard material	m3	345		
3.03	Provide, spread, water, process and compact 300 mm improved subgrade to 100% MDD (AASHTO T99) in two layers of 150 mm thickness.	m3	1,062		
3.04	Provide and compact soft material as fill material as shown in the drawing and as directed by the Engineer	m3	2,078		
3.05	Provide and fill in hard material as shown in the drawing and as directed by the Engineer.	m3	416		
3.06	Provide, Spread and compact rockfill in swampy areas	m3	50		
	Total of Bill № 3 (Carried Forward to Summary)				

BILL № 4: Culvert and Drainage Works					
ITEM	**DESCRIPTION**	**UNIT**	**QTY**	**RATE**	**AMOUNT**
	No separate payment shall be made for the haulage of surplus or unsuitable excavated material and the cost of such haulage shall be included in the rates and/or prices				
4.01	Excavate in soft material for pipe culverts, subsoil drains, headwalls, wing walls, aprons, toe walls, drop inlets, mitre drains, catch water drains and median drains including support of trench sides, backfilling and compacting as specified or as instructed by the Engineer.	m3	576		
4.02	As Item 8.01 but in hard material (any method)	m3	173		
4.03	Allow for hacking in existing concrete drain for junction connections	m3	10		
4.04	Allow for perforation and connecting to the existing drain including stoppage of inflowing water (hole approximately 600 widex800 high x 250 thick)	no.	2		
4.05	Excavate/ desilt, grade to shape inlets outfalls, side drains to free flow conditons including cart to spoil any excess grass debris and soils as and where directed by the Engineer.	m3	50		

4.06	Provide, lay and joint 450 mm Internal Diameter (I. D.) Reinforced Cement Concrete pipes. The rate to include backfilling and compaction to drain formation level	m	110		
4.07	Ditto item 8.06 above but 600mm I.D. Reinforced Cement Concrete pipes	m	24		
4.08	Provide place and compact class 25/20 concrete to headwalls, wingwalls, aprons and toe walls to pipe culverts.	m3	20		
4.09	Provide place and compact 150mm class 15/20 concrete to beds and surround to 450mm diameter pipes (0.4059m3/m)	m3	45		
4.10	Ditto item 8.11 above but 600mm I.D. Reinforced Cement Concrete pipes (0.5259m3/m)	m3	13		
4.11	Allow for in-situ lining with concrete Class 20/20 on outfall drains through built-up areas and limit of works areas and access roads	m3	10		
4.12	Provide and joint 600mm diameter precast concrete invert block drain (IBD) channels with two double side precast side slabs of 600x225x75mm as lining for side drain including bedding and backfilling with selected material as directed by the Engineer.	m	480		
4.13	Extra Over for precast side slabs of 600x225x75mm.	m	960		
4.14	Provide all materials lay and joint shallow IBD as directed by the Engineer to form mitre drains. Rate to include provision of 100mm well compacted bed and jointed by 1:3 cement mortar	m	500		
4.15	Provide and lay 150mm thick grouted stone pitching with ratio 1:4 cement to Mortar, on culvert inlets and outlets and where directed by the Engineer.	m2	40		
4.16	Provide all materials and construct standard untrapped gully pot in concrete class 20/20 reinforced with BRC A142 and with 350x500mm polyresin frames and covers conforming with standard specifications	no.	9		
4.17	Provide and place A142 fabric Mesh reinforcement or equivalent for wing walls, head walls, aprons, toe, inlets and outlets as directed by the Engineer	m2	40		

4.18	Excavate in soft material for service ducts including support of trench sides, backfilling and compacting as specified or as instructed by the Engineer.	m3	35		
4.19	As Item 8.20 but in hard material (any method)	m3	14		
4.20	Provide and lay 450 Dia service ducts of length 10 m each as per the drawings and as instructed by the Engineer	No.	2		
	Total of Bill № 4 (Carried Forward to Summary)				

BILL № 5: Natural Material for Sub-base and Base					
ITEM	**DESCRIPTION**	**UNIT**	**QTY**	**RATE (KShs)**	**AMOUNT (KShs)**
	Measurements and payment by method 'A' as defined in the standard specifications. No separate payments shall be made for the overhaul of material and the cost of such haulage shall be included in the rates and or prices				
5.01	Provide, place, water and compact Natural Gravel Material to 95% MDD (AASHTO T180) of sub base quality for base for the walkways of thickness 150mm and on the carriageway and parking to a consolidated thickness of not more than 300mm as shown in the drawings and as instructed by the Engineer	m3	950.00		
5.02	Prepare surface provide, place, handpack (200mm in one layer)and compact quarry chips (natural blue stone) to refusal densities on the carriageway and parking as directed by the Engineer.	m3	550.00		
	Total of Bill № 5 (Carried Forward to Summary)				

BILL № 6: Concrete Works					
ITEM	**DESCRIPTION**	**UNIT**	**QTY**	**RATE (KSH)**	**AMOUNT (KSH)**
6	CONCRETE				
6.01	Provide and fix on the carriageway and parking interlocking concrete paved unishaped blocks (monolithic single layer precast concrete blocks) of any specified colour/size & shape, with approved pattern of 80 mm thick having average crushing strength of 50 N/mm2 on average thickness of 50 mm complete with uniformly graded river sand cushioning properly compacted with a mechanical compactor to required level, grade and camber as instructed by Engineer. Rate to include bedding sand and that to fill the joints, ties and edge restraints	m2	2,200		
6.01B	Extra over item 17.01 for laying blocks at speed bumps	m2	33		
6.02	Ditto item 17.01 above but for 60mm heavy duty blocks at the walkway	m2	2,208		
6.03	Provide, lay in place and joint 600x600x50mm well cured paving slabs on 50mm well compacted sand/quarry dust bed to footpaths/islands and around the blocks as stipulated in the special Specifications.	m2	100		
BILL 6 TOTAL CARRIED TO SUMMARY PAGE					

BILL № 7: Road Furniture					
ITEM	**DESCRIPTION**	**UNIT**	**QTY**	**RATE**	**AMOUNT**
7A	**Road Marking and Road Signs**				
	Road Marking				
7A.01	Provide and lay hot applied thermoplastic road marking compound in approved colour and shade (ASTM 9) for road marking on bituminous surface on centerline, 100 mm, edge line 150 mm wide 3.0 mm thick, using fully automatic extrusion machine and using pre-melter for melting thermoplastic material including cleaning the surface of all dirt, dust, and other foreign matter, complete with demarcation at site/pre-marking, finishing and managing the traffic movements. Marking to be done as per the specifications, detailed drawings and as instructed by the Engineer.				
	(i) For lane marking (broken lines) with white paint, 100 mm wide	m2	96		
	(ii) For lane marking with yellow paint, 100mm wide	m2	990		
	(iii) For raised kerb lines with black paint, 150 mm wide	m2	144		
70A.02	Provide and lay hot applied thermoplastic road marking compound in approved colour and shade (ASTM 9) for road marking on bituminous road surface on pedestrian crossings, chevrons, directional arrows, give way and stop lines mm thick using fully automatic extrusion machine and using pre-melter for melting thermoplastic. Material, including dispensing drop on glass beads of approved make and as per BS 6088 at the rate of 250g/m² including cleaning the surface of all dirt, dust, and other foreign matter, complete with demarcation at site/ pre-marking, finishing and managing the traffic control. Marking to be done as per the specifications, drawings and as instructed by the Engineer.	m2	300		
7B	**Other Road Furniture**				
7B.01	Provide, lay and Joint complete with hauncing as shown on the drawings and as instructed by the Engineer				
	(i) Raised Kerbs	m	960		
	(ii) Flush Kerbs	m	100		
7B.02	Provide, lay and Joint complete with hauncing as shown on the drawings and as instructed by the Engineer 100 x 125 mm channels for the walkways and shallow drains	m	4,728		
	Total of Bill № 7 (Carried Forward to Summary

CIVIL WORKS - SEWER

	BILL NO. 1.1 - PRELIMINARIES AND GENERAL ITEMS				
Item No	**Description**	**Unit**	**Quantity**	**Rate**	**Amount**
	CLASS A - GENERAL ITEMS				
	Contractual Requirements				
A140.1	Provide for preparation and submission to the employer 1No set of virograph and 2No sets of blue print copies (A1 SIZE) of as built drawings for all the sewer pipelines in the contract. Note that manhole positions in the layout should be actual (geo-referenced to the national grid).	sum	1		
	Specified Requirements				
	Testing of Materials and Works				
A250	Provide for concrete strength test. Rate to include for casting of the necessary number of cubes, curing,transport from site to testing institution and fees payable for the service.	nr	20		
A250.1	Provide for testing of the sewer pipes.Rate to include for transportation to the testing institutions and fees payable for this service.	nr	10		
	Temporary Works				
A272	Traffic regulation (including signages,warning tapes and warning signs); establishment, operation and removal.	Item	1		
	Bill No. 1.1- PAGE 1 TOTAL CARRIED TO SEWER SUMMARRY				

BILL No. 1.2 MEASURED WORKS					
ITEM No.	**DESCRIPTION**	**Unit**	**Qty**		
	The rates quoted by the Contractor shall be deemed to include provision by the Contractor to provide temporary vehicular access to all construction sites including negotiating with private land owners and paying the necessary charges as required.				
	CLASS A - GENERAL ITEMS				
	GENERAL CLEARANCE				
A140.3	Allow for setting out of the works	m	710.00		
	Testing of the works				
A260	Carrying out test on sewer, a pipeline as specified or directed by the engineer, include provision of all equipment and materials	m	710.00		
A277	Allow for keeping trenches and other excavation free of water which may have entered through ground seepage, rain or by other means as directed by the Engineer	sum	1.00		
	CLASS B - SITE INVESTIGATION				
B111	Trial holes where ordered to prove location , construction size etc., of pipelines, services or existing structures, max depth n.e 1m (provisional)	nr	3.00		
B112	Trial holes where ordered to prove location , construction size etc., of pipelines, services or existing structures, max depth 1- 2m (provisional)	nr	3.00		
B113	Trial holes where ordered to prove location , construction size etc., of pipelines, services or existing structures, max depth 2-3m (provisional)	nr	3.00		
	CLASS D - DEMOLITION AND SITE CLEARANCE				
	The rate quoted is for site clearance and demolition along construction wayleave shall be deemed to include removal of the material and carting away to tips, identified by the Contractor in liaison with the Local Authority.				
D100	General site clearance through undeveloped land over the wayleave, include for additional clearance required	ha	0.21		
D210	Removal of trees girth 0.5- 1m (Provisional)	nr	5.00		
D220	Removal of trees girth 1-2m (Provisional)	nr	1.00		
Bill No. 1.2- PAGE 2 TOTAL CARRIED FORWARD TO COLLECTION SHEET					

ITEM No.	DESCRIPTION	Unit	Qty		
	CLASS I - PIPEWORK - PIPES				
	Supply of pipes				
I230.1	**Nomial bore 150mm uPVC Class 34 Pipeline**	m	500.00		
I230.2	**Nomial bore 225mm uPVC Class 34 Pipeline**	m	10.00		
I230.3	**Nomial bore 300 mm DWC HDPE SN8 Pipe**	m	200.00		
	uPVC & DWC HDPE SN8 PIPES WITH SPIGOT AND SOCKET				
	The rates entered against the items in this section shall include for stripping top soil, laying aside and subsequently replacing over refilled trench, excavation in trench in material other than rock, shuttering where necessary, refilling and compacting spreading surplus soil evenly over and alongside pipe trench, compacting, lay and joint pipes to correct line and level. Depths are stated from ground level to invert level.				
	Nominal bore 150 mm in trenches				
I233.1	depth not exceeding 1.5 m.	m	500.00		
	Nominal bore 225 mm in trenches				
I232.1	depth not exceeding 1.5 m.	m	10.00		
	Nominal bore 300 mm in trenches				
I232.1	depth not exceeding 1.5 m.	m	40.00		
I233.1	ditto but depth; 1.5 - 2.0 m.	m	100.00

STUDENT CENTRE

ITEM	DESCRIPTION	UNIT	QTY		
	PROPOSED STUDENT'S CENTRE FOR STUDENT HOUSING PROGRAM (STUDENT CENTRE)				
	BILL NO.1-BUILDERS WORKS				
	ELEMENT NO 1 - SUBSTRUCTURES (ALL PROVISIONAL)				
	Site Clearance				
A	Clear site of all grass, hedges, shrubs, bushes grub up roots, load and remove from site and dispose at designated local authority areas.	SM	792		
B	Excavate average 200mm deep to remove top vegetable soil, load, remove from site and dump in designated local authority dump site.	SM	792		
C	Excavate to reduced levels in varying depths not exceeding 1.5m deep from existing ground levels.	Cm	277		
D	Excavate for Strip foundations depth not exceeding 1.50 metres starting from Reduced ground levels.	Cm	290		
E	Excavate for column bases depth not exceeding 1.5m starting from reduced Levels	Cm	189		
F	Extra over all type of excavation for excavating in soft rock	Cm	144		
	Disposal of water				
G	Allow for keeping the whole of the excavation free from all spring and running water by pumping or any other such means as may be necessary	Item	1		
	Planking and strutting				
H	Allow for maintaining and upholding the sides of excavations and keeping excavations clear of all fallen materials, rubbish etc	Item	1		
	Carried to collection				

ITEM	DESCRIPTION	UNIT	QTY		
	Disposal of excavated material				
A	Return, fill and ram selected excavated material around foundations.	CM	227		
B	Load,wheel and cart away surplus excavated material to a Local Authority designated dumping site or fill soil heaps as away from site instructed by the Project Engineer.	CM	634		
	Fillings				
C	300mm thick hardcore bed: hand packed : compacted in layers not exceeding 150mm thick: to the satisfaction of the Structural Engineer	SM	792		
D	50 mm Thick Murram Blinding to surfaces of hadcore	SM	792		
	Anti - termite to treatment				
F	Approved anti-termite treatment, with ten-year guarantee, sprayed to surfaces of hardcore strictly in accordance with manufacturer's instructions.	SM	792		
	Damp-proof membrane				
G	1000 gauge polythene or other equal and approved damp-proof membrane, laid over blinded hardcore (measured separately) with 300mm side and end laps (measured nett-allow for laps); 1 No. layer: bedded in and including cement and sand (1:3) mortar	SM	792		
	Concrete Blinding				
	Insitu concrete class 15/20 mm aggregates: vibrated:				
H	50 mm Thick under column bases	SM	157		
J	50 mm Thick under strip foundation	SM	264		
	In- situ vibrated reinforced concrete Class 25 (20mm aggregates): in:				
K	Column bases	CM	41		
L	Columns	CM	8		
M	Strip foundation	CM	53		
N	100mm thick surface bed	SM	792		
	Carried to collection				

ITEM	DESCRIPTION	UNIT	QTY		
	Ribbed reinforcement steel bars to KS 573:2014 : Grade 500 high tensile strengthincluding bends, hooks, tying wire and distance blocks; to S.E's detail (Provisional)				
A	Assorted reinforcement	Kg	9,020		
	Mesh fabric reinforcement to K/EAS 412;2 (2019) BRC A142;200 x 200mm, weighing 2.22kg/m² (measured net - no allowance) for laps; in two layers - top & bottom; including bends, tying wire and spacer blocks)				
B	In floor beds.	SM	792		
	Modular steel frame with steel plates covering formwork and/or marine board formwork: to:				
C	Vertical sides of columns	SM	125		
D	Edge of slab not exceeding 150mm girth	LM	115		
	Foundation Walling				
	Natural quarry stones rough dressed; bedded in and including cement and sand (1:4) mortar; reinforced with and including 45 mm wide hoop iron gauge in alternate courses: in:				
E	200mm thick walls in foundations	SM	615		
	Pavings				
F	Supply and lay 600 x 600mm medium duty paving blocks round the Building including laying, spreading and compacting 100mm thick approved sand bed blinding to approval.	SM	70		
	Plinth				
	25mm Thick cement and sand (1:4) rendering on concrete or masonry ; wood float finished; to				
G	Plinths externally	SM	69		
	Two coats black bitumastic paint on:				
H	Rendered surfaces	SM	69		
	Carried to collection

ITEM	DESCRIPTION	UNIT	QTY	RATE	AMOUNT
	PROVISIONAL SUM				
A	Provide a Provisional Sum of Ksh Twenty Million Only (KSH. 20,000,000) for a Rectangular swimming pool overall size 25mx 12.5m x 3m deep, on the deep end and 1.2m on the shallow end including all excavations, waterproofing, back filling, 200mmm thick concreting walling. Finished in ceramic tiling and all associated plumbing and electrical works.	SUM	1	20,000,000	20,000,000.00
B	Provide a Provisional Sum of Ksh Four Million Only (KSH. 4,000,000) for Changing rooms overall size 15mx 3m including all excavations, backing filling, 200mmm thick masonry walling, floor and wall tiling, paint works and all associated plumbing and electrical works	SUM	1	4,000,000	4,000,000.00
	PRIME COST SUMS				
	UNDERGROUND WATER TANK				
C	Allow a Prime Cost sum of Kenya Shillings Five Million (KSHS. 5,000,000) for provision of an Underground water tank with 350,000 Litres capacity as per Engineers specification.	SUM	1		5,000,000
D	Allow for profits and overheads	%			
E	Allow for attendance	Sum			
	LIFT INSTALLATION				
F	Allow a Prime Cost sum of Kenya Shillings Twenty three million, five Hundred thousand (KSHS. 23,500,000) for provision of 4 NO Lifts	SUM	1		23,500,000
G	Allow for profits and overheads	%			
H	Allow for attendance	Sum			
	POWER HOUSE				
I	Allow a Prime Cost sum of Kenya Shillings One Million Five Hundred Thousand (KSHS. 1,500,000) for provision of a Power House.	SUM	1		1,500,000
J	Allow for profits and overheads	%			
K	Allow for attendance	Sum			
	GENERATOR				
L	Allow a Prime Cost sum of Kenya Shilling Three Million Five Hundred thousand (KSHS. 3,500,000) for provision of a Generator	SUM	1		3,500,000
M	Allow for profits and overheads	%			
N	Allow for attendance	Sum			
	CCTV INSTALLATION				
O	Allow a Prime Cost sum of Kenya Shilling Five Million Only (KSHS. 5,000,000) for provision for CCTV installation	SUM	1		5,000,000
P	Allow for profits and overheads	%			
Q	Allow for attendance	Sum			
	STRUCTURED CABLING INSTALLATIONS				
R	Allow a Prime Cost sum of Kenya Shillings Seven Million,Five Hundred Thousand Only (KSHS. 7,500,000) for provision for structured cabling	SUM	1		7,500,000
S	Allow for profits and overheads	%			
T	Allow for attendance	Sum			
	Carried forward to next page				

ITEM	DESCRIPTION	UNIT	QTY	RATE	AMOUNT
	Brought forward from previous page				
	MATV INSTALLATION				
A	Allow a Prime Cost sum of Kenya Shilling ,Five hundred and Fifty Four Thousand for provision for MATV installation	SUM	1		554,000
B	Allow for profits and overheads	%			
C	Allow for attendance	Sum			
	EXTERNAL RETICULATION BOREHOLE WATER				
J	Allow a Prime Cost sum of Kenya Shillings One hundred and one thousand, eight hundred for external borehole water reticulation	SUM	1		101,800
K	Allow for profits and overheads	%			
L	Allow for attendance	Sum			
	BOREHOLE DRILLING AND EQUIPPING				
M	Allow a Prime Cost sum of Kenya Shillings Four Million , five hundred thousand for borehole drilling and equipping	SUM	1		4,500,000
N	Allow for profits and overheads	%			
O	Allow for attendance	Sum			
	EXTERNAL RETICULATION COUNCIL WATER				
P	Allow a Prime Cost sum of Kenya Shillings One hundred and thirty one thousand, eight hundred Only for external council water reticulation	SUM	1		131,800
Q	Allow for profits and overheads	%			
R	Allow for attendance	Sum			
	SANITARY SUPPLY				
S	Allow a Prime Cost sum of Kenya Shillings Eleven Million Only for Sanitary Supply	SUM	1		11,000,000
T	Allow for profits and overheads	%			
U	Allow for attendance	Sum			
	EQUIPING OF WASTE WATER TREATMENT PLANT				
P	Allow a Prime Cost Sum of Kenya Shillings Sixteen Million, Eight Hundred Thousand for equipping of 1500 P.E Waste Water Treatment Plant	SUM	1		16,800,000
Q	Allow for profits and overheads	%			
R	Allow for attendance	Sum			
	HOSE REEL PUMPS				
S	Allow a Prime Cost Sum of Kenya Shillings Four Hundred Thousand for 2 No. Hose Reel Pumps (100 l/min@ 3Bar)	SUM	1		400,000
T	Allow for profits and overheads	%			
U	Allow for attendance	Sum			
	Carried forward to next page				

ITEM	DESCRIPTION	UNIT	QTY	RATE	AMOUNT
	Brought forward from previous page				
	ROOF WATER TANKS				
A	Allow a Prime Cost sum of Kenya Shillings Three Million for 2No. 50,000 Litres GRP roof water tanks	SUM	1		3,000,000
B	Allow for profits and overheads	%			
C	Allow for attendance	Sum			
	WATER PUMPS				
D	Allow a Prime Cost sum of Kenya Shillings Two Million,one hundred thousand for supply and Installation of one set of 50m3/hr @ 5Bar Booster pumps	SUM	1		2,100,000
E	Allow for profits and overheads	%			
F	Allow for attendance	Sum			
	MAIN LV BOARD				
G	Allow a Prime Cost sum of Kenya Shillings Three Million , Two Hundred and Twenty Four Thousand Only for Main LV Board	SUM	1		3,224,000
H	Allow for profits and overheads	%			
I	Allow for attendance	Sum			
	CAPITAL CONTRIBUTION TO KPLC				
J	Allow a Prime Cost sum of Kenya Shillings Five Million , Five Hundred Thousand for capital contribution to Kenya Power and Lighting Company.(KPLC)	SUM	1		5,500,000
K	Allow for profits and overheads	%			
L	Allow for attendance	Sum			
	GROUND BREAKING AND SITE HANDOVER				
M	Allow a provisional sum of Kenya Shillings Five hundred thousand Only (KSHS. 500,000) for Ground breaking ceremony and site handover/commissioning.	SUM	1		500,000
N	Allow for profits and overheads	%			
O	Allow for attendance	Sum			
	MARKETING ON BOMA YANGU				
P	Allow a prime cost of One million (KSHs. 1,000,000) for Marketing and Support to Boma Yangu Platform	SUM	1		1,000,000
Q	Allow for profits and overheads	%			
R	Allow for attendance	Sum			
	PREPARATION AND PRINTING OF RENDERS				
S	Allow a prime cost of Five hundred thousand (KSHs. 500,000) for Preparation of Renders and Printing	SUM	1		500,000
T	Allow for profits and overheads	%			
U	Allow for attendance	Sum

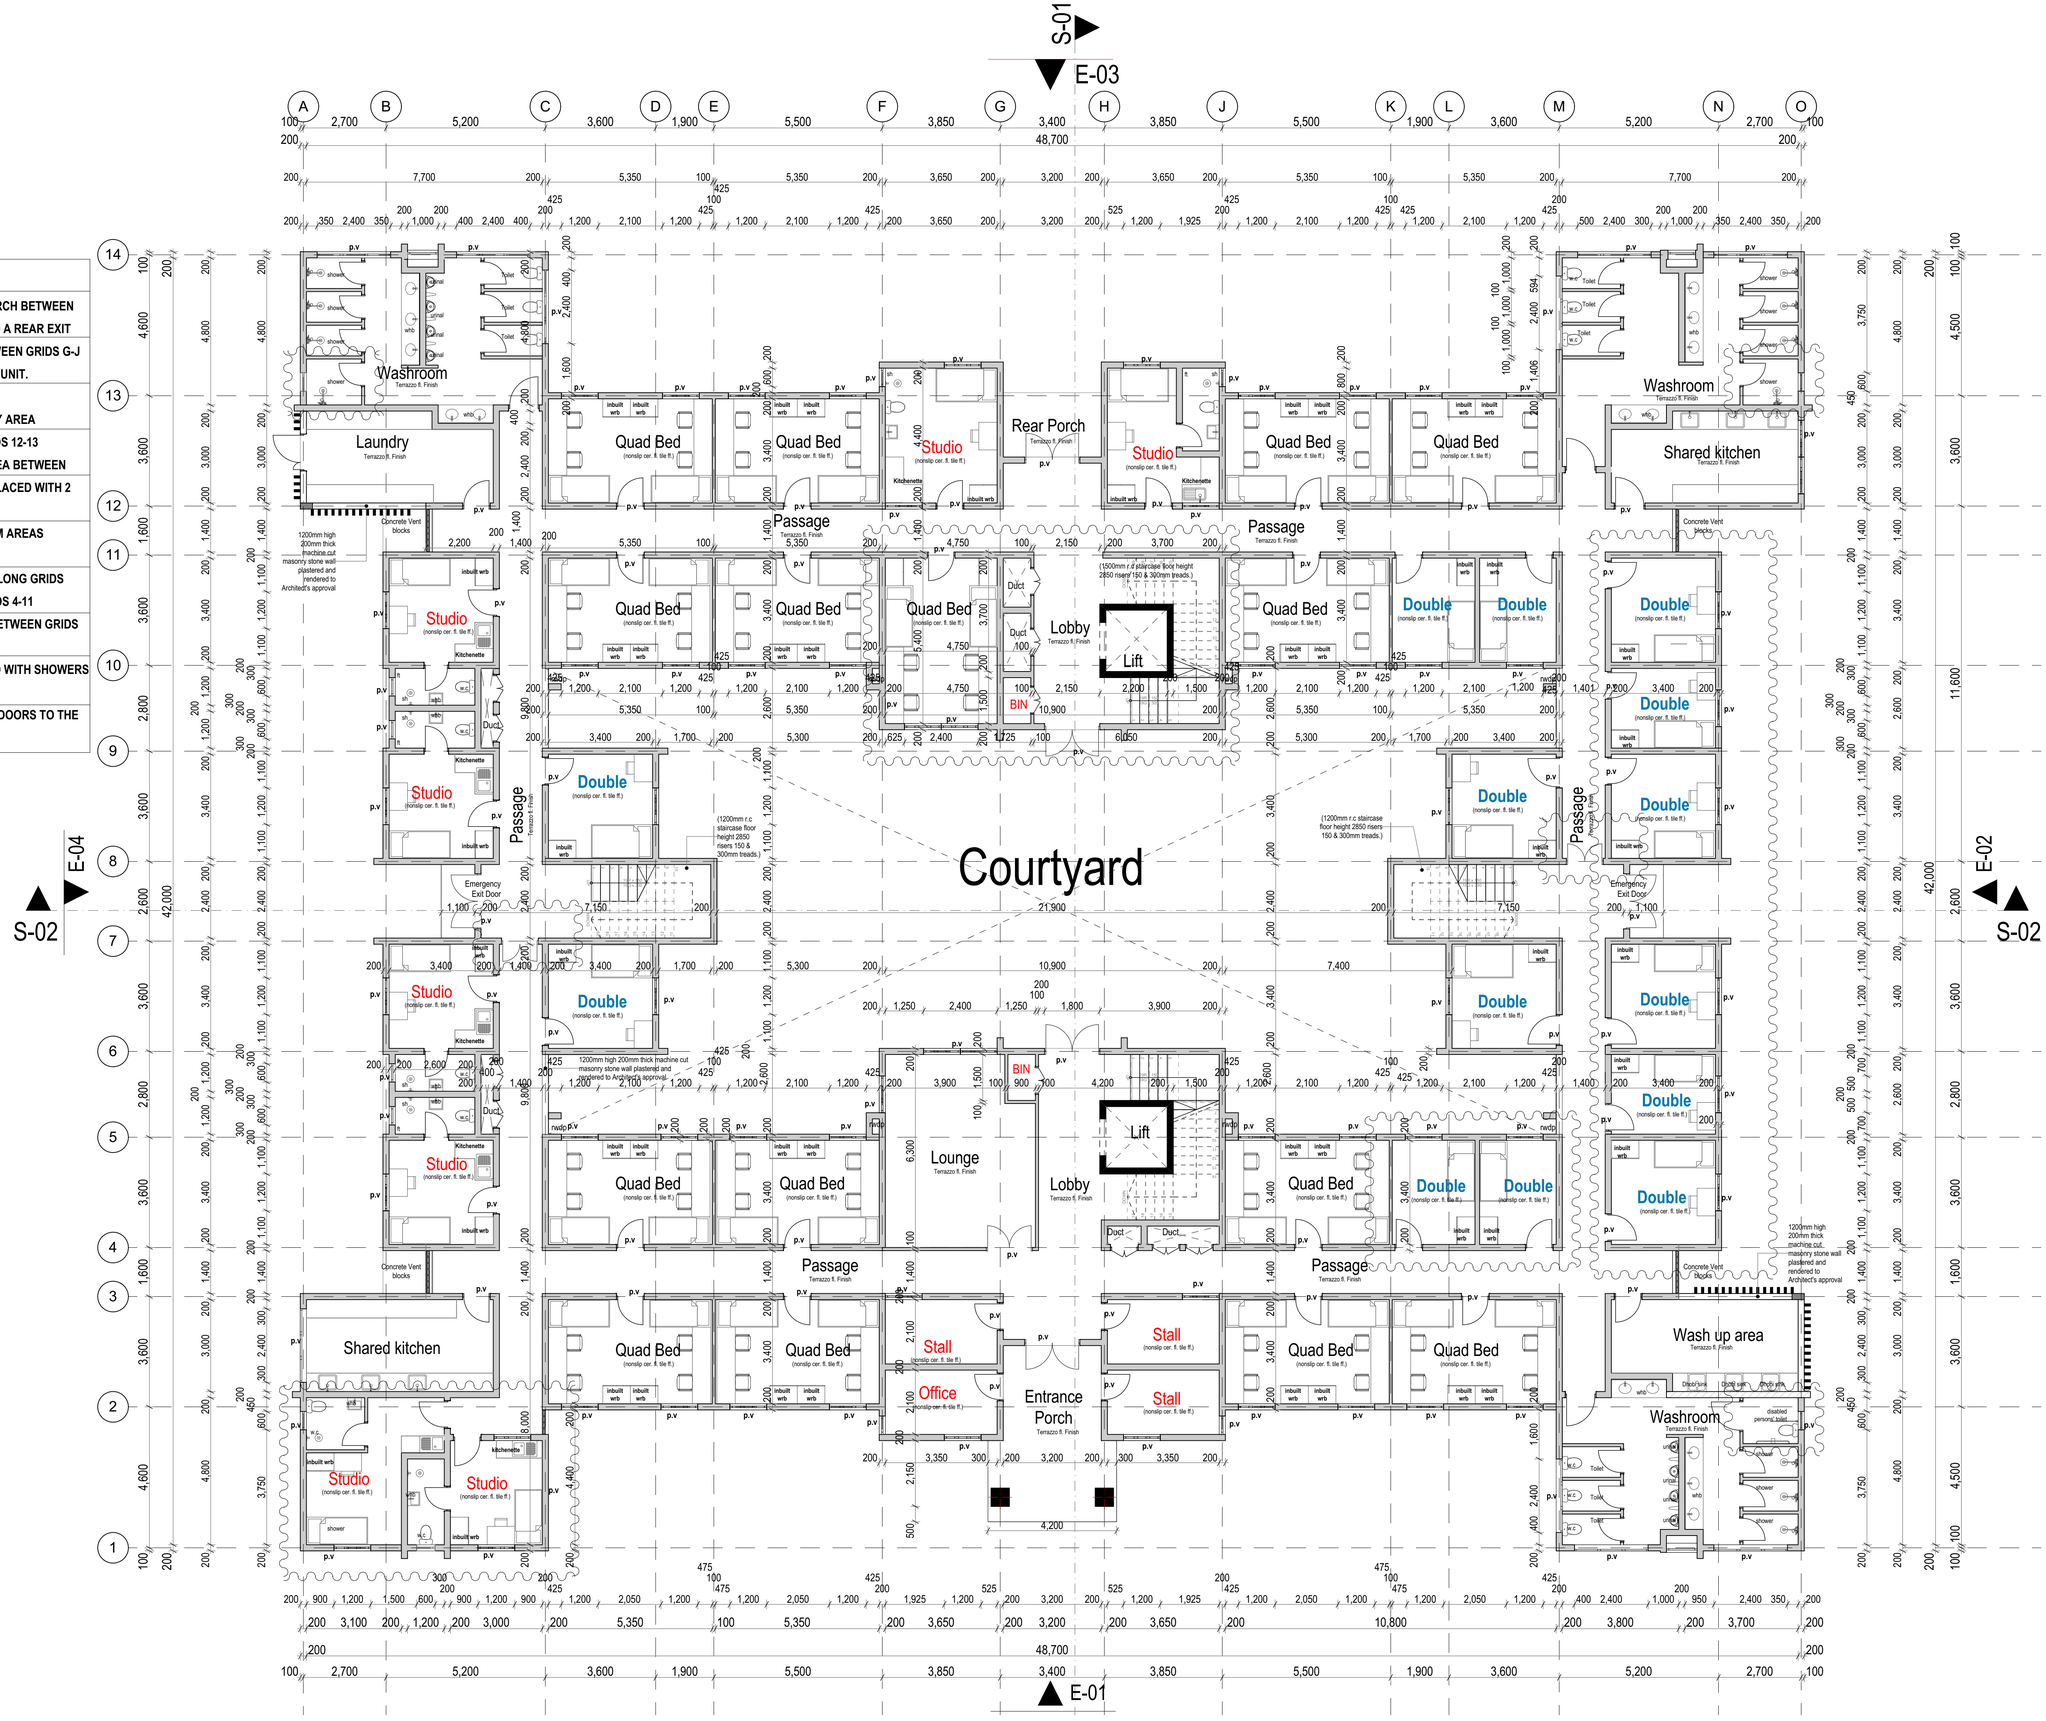
REVISION NOTES
-RE-DESIGN OF ENTRANCE PORCH BETWEEN GRIDS G-H AND GRIDS 12-13 TO A REAR EXIT
-MAIN LOBBY REDESIGN (BETWEEN GRIDS G-J AND 9-11) TO INCLUDE A QUAD UNIT.
-RELOCATION OF THE DUCTS
-INTRODUCTION OF A LAUNDRY AREA
BETWEEN GRIDS A-C AND GRIDS 12-13
-OMISSION OF WASHROOM AREA BETWEEN GRIDS A-C AND GRIDS 1-2 REPLACED WITH 2 STUDIO UNITS
-REDESIGN OF THE WASHROOM AREAS
-INTRODUCTION OF STALLS
-SINGLE UNITS INTRODUCED ALONG GRIDS BETWEEN GRIDS M-N AND GRIDS 4-11
-SINGLE UNITS INTRODUCED BETWEEN GRIDS K-M AND GRIDS 5-6
-DISABLED TOILETS REPLACED WITH SHOWERS GRIDS A-O AND GRIDS 13-14
-INTRODUCTION OF 2 NO. FIRE DOORS TO THE FIRE EXITS



GROUND FLOOR PLAN

SCALE 1:100

REVISION 01

GENERAL NOTES

1. This drawing to be read in conjunction with Engineers' drawings.
2. All dimensions are in mm unless otherwise specified.
3. Drawings are not to be scaled. Only figured dimensions should be used.
4. The contractor must check and verify all dimensions before commencement of work and if necessary confirm with the architect.

CONSTRUCTION

Approved anti-termite treatment & 1000 gauge polythene sheeting cover to be provided under all ground floor concrete slab on compacted hardcore to approval.
DPC to be 3ply bituminous felt to be provided under all walls.

STRUCTURAL

1. All Black cotton soil to be removed from below all building and paved surfaces
2. All reinforced concrete work will be in accordance with structural drawings.
3. Foundation depths to be determined on site to S.E approval
4. All walls less than 200mm thick to be reinforced with hoop iron at every alternate course.
5. All adjacent R.C work and masonry walls to be tied with strap irons at every course

MECHANICAL

1. All Plumbing and Drainage Work to comply with specifications
2. S.V.P denotes soil vent pipe and to be provided at the head of the drainage
3. Where drainage is shown under driveways and slabs, to be encased in 150mm thick concrete surround.
4. All underground foul and waste drain pipes shall be of PVC to comply with BS5255
5. All ICs within building area, driveway and parking to have heavy duty,double-seal airtight covers and walls to be 200mm.
6. Minimum slope in the drain pipes to be 1%
7. No chases for pipes will be allowed in the slabs
8. Sleeves will be allowed with written approval from S.E.
9. No cutting of concrete without express approval of the Architect or S.E
10. All testing of pipes must be coordinated with electrical and any conflicts must be resolved before works begin
11. Permanent vents denoted as P.V to be provided as shown on plan.

ELECTRICAL

All conduits must be laid before plastering

GENERAL NOTES

1. This drawing to be read in conjunction with Engineers' drawings.
2. All dimensions are in mm unless otherwise specified.
3. Drawings are not to be scaled. Only figured dimensions should be used.
4. The contractor must check and verify all dimensions before commencement of work and if necessary confirm with the architect.

CONSTRUCTION

Approved anti-termite treatment & 1000 gauge polythene sheeting cover to be provided under all ground floor concrete slab on compacted hardcore to approval.
DPC to be 3ply bituminous felt to be provided under all walls.

STRUCTURAL

1. All Black cotton soil to be removed from below all building and paved surfaces
2. All reinforced concrete work will be in accordance with structural drawings.
3. Foundation depths to be determined on site to S.E approval
4. All walls less than 200mm thick to be reinforced with hoop iron at every alternate course.
5. All adjacent R.C work and masonry walls to be tied with strap irons at every course

MECHANICAL

1. All Plumbing and Drainage Work to comply with specifications
2. S.V.P denotes soil vent pipe and to be provided at the head of the drainage
3. Where drainage is shown under driveways and slabs, to be encased in 150mm thick concrete surround.
4. All underground foul and waste drain pipes shall be of PVC to comply with BS5255
5. All ICs within building area, driveway and parking to have heavy duty,double-seal airtight covers and walls to be 200mm.
6. Minimum slope in the drain pipes to be 1%
7. No chases for pipes will be allowed in the slabs
8. Sleeves will be allowed with written approval from S.E.
9. No cutting of concrete without express approval of the Architect or S.E

DOOR SCHEDULE

REVISION 01

GENERAL NOTES

1. This drawing to be read in conjunction with Engineers' drawings.
2. All dimensions are in mm unless otherwise specified.
3. Drawings are not to be scaled. Only figured dimensions should be used.
4. The contractor must check and verify all dimensions before commencement of work and if necessary confirm with the architect.

CONSTRUCTION

Approved anti-termite treatment & 1000 gauge polythene sheeting cover to be provided under all ground floor concrete slab on compacted hardcore to approval.
DPC to be 3ply bituminous felt to be provided under all walls.

STRUCTURAL

1. All Black cotton soil to be removed from below all building and paved surfaces
2. All reinforced concrete work will be in accordance with structural drawings.
3. Foundation depths to be determined on site to S.E approval
4. All walls less than 200mm thick to be reinforced with hoop iron at every alternate course.
5. All adjacent R.C work and masonry walls to be tied with strap irons at every course

MECHANICAL

1. All Plumbing and Drainage Work to comply with specifications
2. S.V.P denotes soil vent pipe and to be provided at the head of the drainage
3. Where drainage is shown under driveways and slabs, to be encased in 150mm thick concrete surround.
4. All underground foul and waste drain pipes shall be of PVC to comply with BS5255
5. All ICs within building area, driveway and parking to have heavy duty,double-seal airtight covers and walls to be 200mm.
6. Minimum slope in the drain pipes to be 1%
7. No chases for pipes will be allowed in the slabs
8. Sleeves will be allowed with written approval from S.E.
9. No cutting of concrete without express approval of the Architect or S.E
10. All testing of pipes must be coordinated with electrical and any conflicts must be resolved before works begin
11. Permanent vents denoted as P.V to be provided as shown on plan.

ELECTRICAL

All conduits must be laid before plastering

STATE DEPARTMENTFOR HOUSING & URBAN DEVELOPMENT

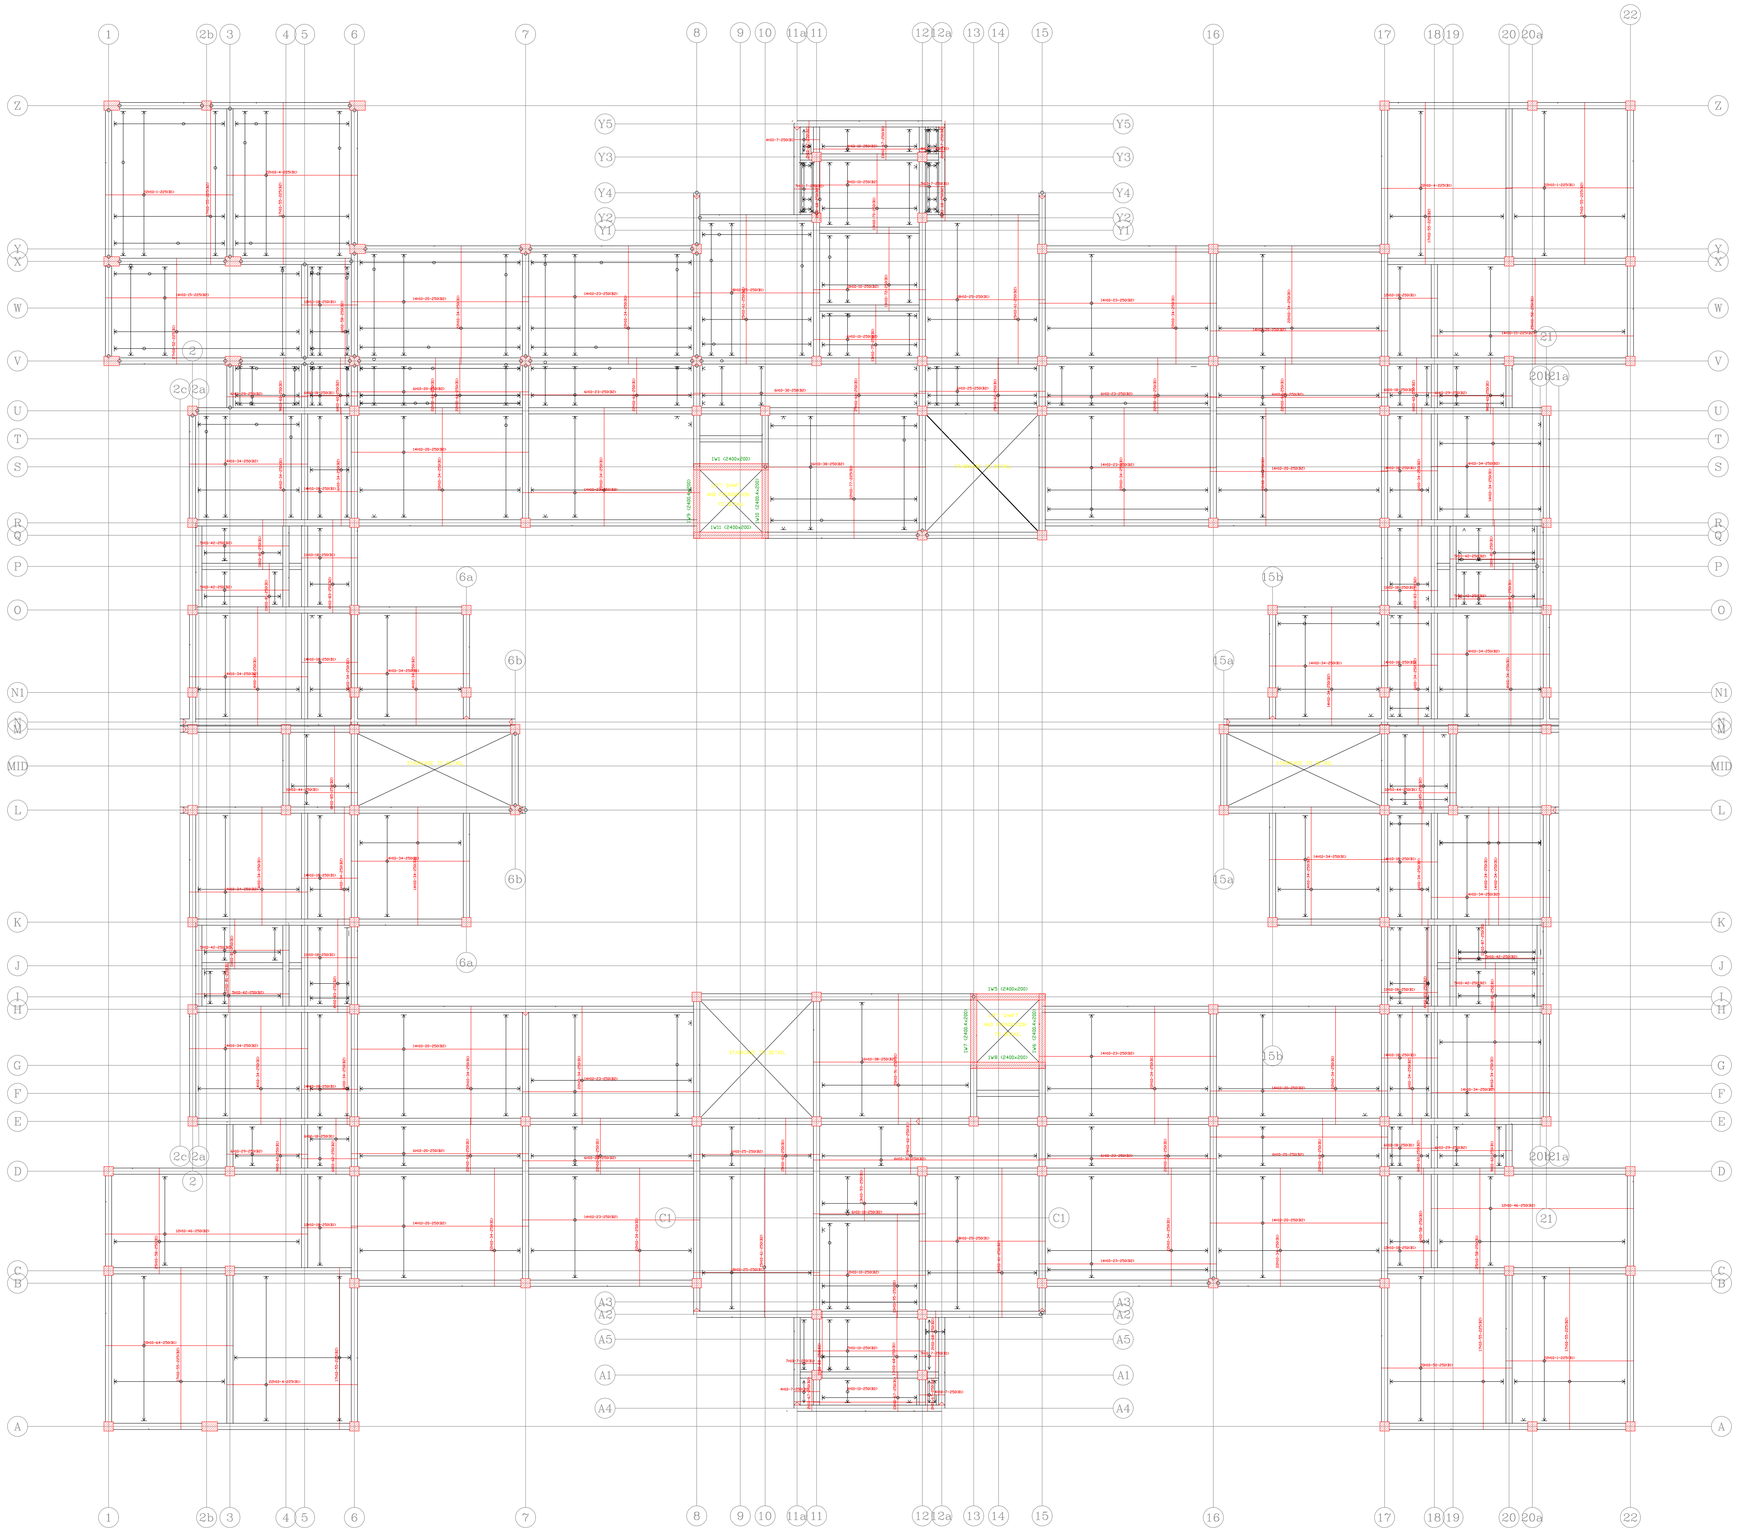
Ing._CBD8CB4D CBD8CB4Dimp

FOR THE GOVERNMENT OF THE REPUBLIC OF KENYA



1ST FLOOR REINFORCEMENT DETAILS

GENERAL NOTES

1. This drawing to be read in conjunction with Engineers' drawings.
2. All dimensions are in mm unless otherwise specified.
3. Drawings are not to be scaled . Only figured dimensions should be used .
4. The contractor must check and verify all dimensions before commencement of work and if necessary confirm with the architect .

CONSTRUCTION

Approved anti-termite treatment & 1000 gauge polythene sheeting cover to be provided under all ground floor concrete slab on compacted hardcore to approval .
DPC to be 3ply bituminous felt to be provided under all walls.

STRUCTURAL

1. All Black cotton soil to be removed from below all building and paved surfaces
2. All reinforced concrete work will be in accordance with structural drawings .
3. Foundation depths to be determined on site to S.E approval
4. All walls less than 200mm thick to be reinforced with hoop iron at every alternate course.
5. All adjacent R.C work and masonry walls to be tied with strap irons at every course

MECHANICAL

1. All Plumbing and Drainage Work to comply with specifications
2. S.V.P denotes soil vent pipe and to be provided at the head of the drainage
3. Where drainage is shown under driveways and slabs, to be encased in 150mm thick concrete surround.
4. All underground foul and waste drain pipes shall be of PVC to comply with BS 5255
5. All ICs within building area , driveway and parking to have heavy duty ,double-seal airtight covers and walls to be 200mm.
6. Minimum slope in the drain pipes to be 1%
7. No chases for pipes will be allowed in the slabs
8. Sleeves will be allowed with written approval from S.E.
9. No cutting of concrete without express approval of the Architect or S .E
10. All testing of pipes must be coordinated with electrical and any conflicts must be resolved before works begin
11. Permanent vents denoted as P .V to be provided as shown on plan .

ELECTRICAL

All conduits must be laid before plastering
